New Generation Orthodontic Materials – What does the future hold?

By

Professor Gerry Bradley

After Dr. Bradley completed his undergraduate studies in Cork, he then attended Ohio State University in Columbus where he concluded a three year residency in Orthodontics. He has been exclusively practicing orthodontics since 1994, and is a member of The American Association of Orthodontists and The American Dental Association. He is chairman of the Orthodontic Residency Training at the Marquette University School of Dentistry and is an associate professor of Orthodontics.

Dr. Bradley has lectured both nationally and internationally regarding treatment outcomes and orthodontic appliances, and has over 30 publications in orthodontic literature.
