

Developing your routine for endodontics – ProTaper Next

HALF-DAY HANDS-ON COURSE

LIMITED to 12
PARTICIPANTS

FRIDAY MAY 17, 2019
FOTA ISLAND RESORT, CORK

REGISTRATION: 9.00AM
COURSE: 9.30AM TO 1.30PM

SPONSORED BY:

This course will cover one of the newest rotary systems available for the preparation of root canals, the Protaper Next system.

This hands-on course will discuss the merits of the Protaper Next system of endodontic preparation. It will show how Protaper Next has been developed with fewer files and improved flexibility with a view to the shaping of curved canals.

The course will cover the importance of access cavity preparation and straight line access.

The versatility in the use of ultrasonics and various irrigation protocols will be included in the course content.

Participants will be given the opportunity to use Pathfiles, Guttacore in the Thermaprep oven and the Calamus unit for the warm obturation of the prepared root canals.

This course is specifically aimed at those practitioners familiar with using a rotary endodontic system.

Patrick O'Driscoll qualified from Cork in 1986. He worked as a general practitioner for a number of years in the UK. He attained his Master's in Endodontics from the Eastman Dental Institute in London in 1997,

and a Master's in Medical Science in Endodontics from University College Cork in 2000. He is a

member of the Irish Dental Association, the Irish Endodontic Society, the International Association of Dental Traumatology and the American Endodontic Association. He is a certified member of the European Society of Endodontology. He has been elected a Fellow of the International Association of Dental Traumatology. Over 19 years ago he established the Cork Endodontic Clinic (corkendoclinic.com), a practice that is limited to endodontics.

IDA member €250

Non-IDA member €500
