

# ORAL RADIOLOGY COURSE

All workshops take place at 6.30 – 7.30pm  
174 Stillorgan Road, Donnybrook, Dublin 4

## ORAL RADIOLOGY

Tuesday 19th Feb

Tuesday 12th March

Tuesday 9th April

**Interpreting dental panoramic radiographs**

**The uses of cone beam CT**

**The clinical audit in dental radiography**

*Dr Brendan Fanning*

The overall aims of the series are to give an understanding of Radiation Physics, the risks of Ionising Radiation, the principles of Radiation Protection and Quality Assurance in Dental Radiography.

The series also aims to give an understanding of diagnostic problems and interpretation of radiographic images, particularly the Dental Pantomograph. The final aim is to introduce participants to the uses and the Guidelines for use of Cone Beam CT in dental practice.

### Outcomes

- By gaining an understanding of Radiation Protection, the participants will be able to optimise the radiation dose to patients.
- The participants will be encouraged to carry out a clinical audit (or re-audit) of their dental radiography. This Quality Assurance programme will result in better x-ray images, fewer retakes and a lower patient dose.
- The participants will be familiarised with recent advances in Dental Radiology.

**LIMITED to 12 PARTICIPANTS ON EACH EVENING**

**Delegates can choose to do one or all three of the workshops.**

Brendan graduated from TCD in 1981 and received an MSc in Dental and Maxillofacial Radiology from the University of London in association with King's College London in 2007. He works in General Dental practice in Ashford, CO. Wicklow and dental radiology practice in Dublin. He is a member of the European Academy of Dento-Maxillofacial Radiology and the British Society of Dental and Maxillofacial Radiology. He has presented at a number of national and international conferences. He has published papers on optimisation and justification in dental radiology in the *Journal of the Irish Dental Association*.
