With thanks to:

Implant placement and restoration: the course to get you started in implant dentistry

Course lecturers: *Dr Ronan Allen, Dr Ed O'Reilly*

LIMITED to 8 PARTICIPANTS

1. The assessment, diagnosis and treatment planning of patients presenting for a single unit implant restoration.
2. Introducing the concept and steps needed for restoratively driven dental implant placement in a bench-top model.
3. How to perform ideal impression making; a simple guide to selecting correct impression copings.
4. Choosing the appropriate material for your implant restoration.
5. Implant restorations; screw versus cement retained; fitting the restoration and managing occlusion for single implant crowns.

9:30 – 10:15	Introductory review of anatomy, bone biology and wound healing relevant to basic implant dentistry.
10:15 – 11:00	Introduction to basic Implant surgery; assessment of patient, diagnosis and treatment planning.
11:00 – 12:00	Hands-on part.1 A basic introduction on how a single implant is placed on a bench top model in a restoratively driven ideal position.
12:00 – 12:45	LUNCH
12:45 – 2:00	Implant restoration: Introduction to impression making, lab prescription and material choices.
2:00 – 3:00	Hands-on part 2. Implant impression making using a bench top model for a single unit implant. Demonstration of both open-tray and closed-tray techniques.
3:00 – 4:30	Hands-on part 3. Introducing the fit/ lute of both a screw retained and cemented retained single implant restoration.
