KERRY

Wisdom in the Kingdom

May 17 – 20, 2012

The Malton Hotel, Killarney, Co. Kerry

CPD VERIFIABLE

Introducing...

Colgate®

Duraphat® 5000ppm toothpaste

Sodium Fluoride 1.1%

Clinically proven high fluoride toothpaste

Colgate Duraphat® 5000ppm fluoride toothpaste provides dental professionals with a clinically proven and evidence-based approach to caries prevention.

- Indicated for the prevention of dental caries in patients 16 years and over
- For daily use instead of regular toothpaste

Proven efficacy:

- Clinically proven efficacy
- Approximately 70% caries reduction¹
- Reverses 76% of root caries lesions after 6 months use²

Available as a 51g tube,
in cases of 12

Colgate Duraphat® 5000ppm Fluoride Toothpaste

Name of the medicinal product: Duraphat® 500 mg/100 g Toothpaste. **Active ingredient:** Sodium Fluoride 1.1 %w/w (5000ppm F). 1 g of toothpaste contains 5mg fluoride (as sodium fluoride), corresponding to 5000ppm fluoride. **Indications:** For the prevention of dental caries in adolescents and adults over 16 years of age, particularly amongst patients at risk from multiple caries (coronal and/or root caries). **Dosage and administration:** Brush carefully on a daily basis applying a 2 cm ribbon onto the toothbrush for each brushing, 3 times daily, after each meal. **Contraindications:** This medicinal product must not be used in cases of hypersensitivity to the active substance or to any of the excipients. **Special warnings and precautions for use:** An increased number of potential fluoride sources may lead to fluorosis. Before using fluoride medicines such as Duraphat®, an assessment of overall fluor intake should be done. Fluoride tablets, drops, chewing gum, gels or varnishes and fluoridated water or salt should be avoided during use of Duraphat® Toothpaste. When carrying out overall calculations of the recommended fluoride ion intake, which is 0.05 mg/kg per day from all sources, not exceeding 1 mg per day, allowance must be made for possible ingestion of toothpaste (each tube of Duraphat® 500 mg/100 g Toothpaste contains 255 mg of fluoride ions). This product contains Sodium Benzoate. Sodium Benzoate is a mild irritant to the skin, eyes and mucous membrane. **Undesirable effects:** Gastrointestinal disorders; Frequency not known (cannot be estimated from the available data); Burning oral sensation; Immune system disorders; Rare ($\geq 1/10,000$ to $<1/1,000$): Hypersensitivity reactions. **Legal classification:** POM. **Marketing authorisation number:** PA 320/8/2. **Marketing authorisation holder:** Colgate-Palmolive (U.K.) Ltd, Guildford Business Park, Middleton Road, Guildford, Surrey, GU2 8JZ. **Recommended retail price:** €8.69 (51g tube). **Date of revision of text:** October 2008.

For full prescribing information, please contact the marketing authorisation holder/distributor, Colgate-Palmolive (U.K.) Ltd., Guildford Business Park, Middleton Road, Guildford, Surrey, GU2 8JZ.

Colgate®

YOUR PARTNER IN ORAL HEALTH

Dear Colleague

Welcome to 'Kerry – Wisdom in the Kingdom'. We return to the ever popular Malton Hotel in the heart of Killarney for our Annual Conference 2012.

In these challenging times, we've seen over recent years that it is more important than ever to keep your clinical skills sharp in order to perform your best possible dentistry, and with severe cutbacks introduced in recent years right across the profession, it is vital that you attend your Annual Conference.

Along with the many world-renowned speakers on our programme, we also welcome many well-known national speakers, who will educate and inform us over the four days.

With over 40 trade companies in attendance, this year's trade exhibition is bound to add spark to the event. Meet with company representatives directly and find out how the latest products work, sample the most recent developments and talk through new ideas. The trade show is a must see for the whole dental team.

We would also strongly encourage members to attend the AGMs for the Dental Association and the Irish Dental Union commencing on Thursday May 17th at 6pm in the Muckcross Suite

As ever, the social side to the Annual Conference is paramount to a successful few days! It is an ideal opportunity to catch up with old friends, meet a few new ones and link up with dental colleagues. Some new and exciting events have been added to our social programme for 2012, not forgetting our ever popular golf competition, which will take place on Sunday May 20, and the highlight of our social calendar, our Annual Dinner on Saturday night.

'Kerry – Wisdom in the Kingdom' is a conference not to be missed by you and all of your dental team.

We look forward to welcoming you to the Kingdom in May 2012.

Dr Andrew Bolas
President Elect

A Chairde,

Fáilte go "Ciarraí – Eagnaíocht sa Ríocht". Fillimid ar an Óstán Malton, go mbíonn síor tóir air i gcroílár Chill Áirne i gcóir 2012.

Sna amanta dúshlánacha seo, tá sé feicthe againn le blianta beaga anuas, go bhfuil sé níos tábhachtaí ná riamh, do scileanna oibre a bheith suas chun dáta ionas go mbeifeá in ann seirbhís fiacloireachta den scoth a chur ar fáil. Maidir leis na ciorraithe uafásacha atá tagtha inár dtreo le déanaí, mar fiacloirí, tá sé rí-thábhachtach go mbeifeá i láthair ag do comhdháil bhliantiúil.

I dteannta roinnt léachtóirí clúiteacha ar an gclár, tá roinnt ón ár dtír féin a gcuirfidh oideachas orainn agus a thabharfaidh eolas dúinn, thar ceithre lá.

Le breis agus daichead comhlachtaí trádála i láthair, caithfidh an taispeántas trádála, cur leis an ócáid. Tóg do sheans chun buaileadh leis na ionadaithe trádála go pearsanta agus bí ar an eolas maidir le táirgí nua agus bí ag caidreamh leotha. Caithfidh do fhoireann ar fad í seo a bhlaiseadh.

Iarrfaimid go mór ar baill chomh maith, freastal ar na cruinnithe ginearálta bliantiúil, don Chumann Déadach agus d' Aontas Fiacloirí na hÉireann, ag tosnú ag 6ín, Deardaoín 17ú Bealtaine, i seomraí Mhucrois.

Mar is gnáth, tá an taobh sóisialta den comhdháil fíor – thábhachtach, chun tairbhe a bhaint aisti. Ná lig na maidí le sruth, ach buail le' shean chairde, cuir aithne ar dhaoine nua, agus dein teangabháil le do chomhleacaithe. Tá roinnt imeachtaí spéisíúla curtha leis an gclár sóisialta i 2012, gan dearmhad a dhéanamh ar an comórtas gailf fíor-tharraingtach, a bheidh ar siúl ar an nDomhnach 20 Bealtaine agus buachphointe na hocáide ná an Dinnéar bhliantiúil ar oíche an tSathairn.

"Ciarraí- Eagnaíocht sa Ríocht". Deirim leat, gan an deis a thapú duit féin agus dod fhoireann a bheith i láthair i mbliana.

Táimid ag siúl le fáilte Uí Cheallaigh a chur romhaibh sa "Ríocht" i mí Bealtaine 2012.

Fintan Hourihan
Chief Executive

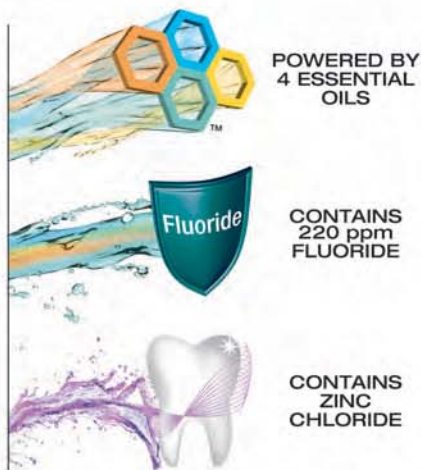

NEW

INTRODUCING **LISTERINE® TOTAL CARE ZERO**

Highly effective yet alcohol-free for a less intense taste

LISTERINE® TOTAL CARE ZERO is alcohol-free yet retains the LISTERINE® brand's 4 essential oils. So it has a soft taste¹ but it kills up to 99% of plaque bacteria in vitro, more than the leading alcohol-free daily use mouthwash brand.² In addition, TOTAL CARE ZERO contains 220 ppm (0.05%) fluoride

with high uptake³ for extra enamel protection, and zinc chloride to reduce calculus formation⁴ and help keep teeth white. So when patients want a less intense, alcohol-free mouthwash, why not add LISTERINE® TOTAL CARE ZERO to their oral care routine?

**LISTERINE®
TOTAL CARE ZERO**
Adds zero alcohol to the LISTERINE® TOTAL CARE range

Suitable for patients 6+.

INTRODUCTION

AGM

The Annual General Meeting of the Irish Dental Association and also the Irish Dental Union will take place at **6.00pm on Thursday May 17, 2012 in the Muckross Suite.**

All members are urged to attend this important meeting.

REGISTRATION

Thursday 8.00am – 5.00pm

Friday 8.00am – 5.00pm

Saturday 9.00am – 11.00am

All delegates must register before attending any of the conference sessions.

CONFERENCE BADGES (No Badge – No Entry)

Conference badges must be worn to gain admittance to any of the scientific sessions and trade show. Your co-operation would be appreciated.

INFORMATION DESK

An information desk is located in the Conference Centre to deal with any queries you may have. CPR refresher courses for all dental team members can be booked at the desk. Social events may also be booked here.

CONTINUING PROFESSIONAL DEVELOPMENT (CPD)

The scientific sessions have been approved for continuing professional development (CPD) credit.

Forms will be available for each morning and afternoon session at the accreditation desk in the Conference registration area. For each morning/afternoon session you attend, a separate form must be signed and must include your accreditation number (Dental Council Registration Number).

ANNUAL DINNER

The Annual President's Dinner Dance will take place on Saturday May 19. Dress code is Black Tie. Tickets can be booked by contacting IDA House.

(Tickets cannot be guaranteed after Thursday May 17).

COURTESY

Please ensure that noise is kept to a minimum around the conference area during scientific sessions so as not to disturb those attending the session

MOBILE PHONES

Use of mobile phones is not permitted in the conference area. Please ensure that all phones are turned off on arrival.

GP MEETING

Please note that this year's GP Meeting will be held from 5.30pm – 7.00pm on Friday May 18 in the Mangerton suite.

CONFERENCE COMMITTEE

Dr Billy Davis

Dr Maurice Fitzgerald

Dr Peter Gannon

Dr Gerry McCarthy

Ms Elaine Hughes

PROGRAMME COLOUR CODE AND CONTENTS

Pre-Conference Programme 3

Dental Team Day 9

Dentists' Programme 10

Dental Nurses' Programme 10

Dental Hygienists' Programme 10

Dental Technicians' Programme 11

Dr Pat Cleary

1. Developing your routine for endodontics

Dr Pat Cleary

FULL-DAY PRACTICAL COURSE

This hands-on course will include:

1. Case selection and assessment
2. Access cavity preparation
3. Cleaning and shaping
4. Disinfection
5. Obturation

(Participants will be required to bring extracted teeth.)

Dr George Priest

2. Smile line revitalisation with crowns, veneers and implants

Dr George Priest

FULL-DAY LECTURE COURSE

Dentists are often challenged to provide aesthetically pleasing smiles for patients with missing teeth or teeth compromised by dental caries, wear, age, erosion or pernicious habits. The goal is to preserve remaining tooth structure and prevent further breakdown. However, dentists are also presented with the opportunity to not only restore, but to enhance these patients' dental aesthetics. The sequential treatment steps of smile line rehabilitation are largely influenced by the anticipated aesthetic results. Topics of discussion at this course will include specific methods of crown, veneer and implant restoration, diagnostic waxing, provisional restorations as the aesthetic template, soft tissue development and sequential restoration techniques that simplify the process of complete rehabilitation. Treatment plans involving combinations of crowns, veneers and implant restorations are presented.

Dr Don Morrow

Dr Jennifer Irwin

3. Motivational interviewing – Oral health: motivational interviewing skills for dental professionals

Drs Don Morrow and Jennifer Irwin

HALF-DAY LECTURE AND PRACTICAL WORK

These half-day workshops are experiential, practical sessions devoted to the hands-on learning of motivational interview skills. Delegates/participants will learn first-hand such applied skills as: using powerful questions; listening more acutely; moving status talk to change talk; using accountabilities and acknowledgements; rolling with patient resistance; and, shifting perspectives in order to change behaviour. Our singular learning objective is focused on how to integrate motivational interviewing tools and skills into professional practices in service of having greater impact on the patient's (and caregiver, if applicable) oral healthcare.

Dr Edward Cotter

4. Lab work – Denture repairs and denture additions: a useful skill in daily dental practice

Dr Edward Cotter

HALF-DAY PRACTICAL

A broken denture or the need to add a tooth to an existing denture are common events in dental practice. For the dentist to be able to carry out the procedure in a timely manner is a great service for the patient. This hands-on course will allow participants to repair a broken denture, and also to carry out an addition to an existing denture. Principles of these techniques will be discussed, along with use of appropriate materials and equipment.

Ms Bethany Valachi

5. Ergonomics – Neck, back and beyond: preventing pain for peak productivity

Ms Bethany Valachi

HALF-DAY PRACTICAL

Two out of three dental professionals experience work-related pain that can affect quality of life, productivity or career longevity. This research-based seminar for dentists, hygienists and assistants bridges the gap between dental ergonomics and work-related pain so you can work more comfortably, increase productivity and extend your career. Through lecture, demonstration and participation, attendees will learn how posture, movement, equipment selection, adjustment and operator layout impact their health, and apply evidence-based interventions. Team members will walk away with techniques they can apply immediately in the operatory.

2012 sees five pre-conference programmes taking place, two full-day programmes, and three half-day programmes, which will be repeated in both the morning and afternoon. These options, we feel, will offer members more choice.

A reduction will be given to those who book two half-day courses, i.e. one in the morning and one in the afternoon. See booking form for details.

9.30 – 5.00	MUCKROSS SUITE A	FULL DAY	9.30 – 1.00	WRITERS ROOM	HALF DAY
	Developing your routine for endodontics		or	Lab work – Denture repairs and denture additions:

Mr Frank Meyer

AUDITS IN HAND HYGIENE – INFORMATION WORKSHOP

The dental clinician must perform hand hygiene at key points in time to disrupt the transmission of microorganisms. But what is the correct technique for hand washing and using hand gel? Are your hand washing facilities what they should be? In this short session you will answer these questions and come away with an audit tool to record that your hand hygiene meets the HIQA standard. Workshops provided by Dr Jane Ranehan.

Workshop Times

Friday: 11:00am Saturday: 9:30am, 11:00am

* Workshops are open to all registered delegates and are of 40 minutes duration.

Designed with you, for your patients

1 in 3 patients suffers from the pain of dentine hypersensitivity,¹ with most of those affected aged between 20 and 50.² Unfortunately more than half of these patients don't seek dental advice, leaving 50% of those who suffer untreated.¹

For 50 years we've been at the forefront of scientific research, working with leading dental care experts to develop solutions that have provided millions of patients relief from dentine hypersensitivity. Today we continue to strive to offer the best solutions for you and your patients.

Sensodyne offers a range of clinically proven formulations to provide relief from dentine hypersensitivity³⁻¹⁶

Sensodyne Repair & Protect	Sensodyne Rapid Relief	Sensodyne potassium formulations
<ul style="list-style-type: none"> NovaMin[®] advanced calcium phosphate technology builds a reparative hydroxyapatite-like layer over exposed dentine and within the tubules³⁻⁷ Creates an effective and lasting barrier to the pain of dentine hypersensitivity³⁻¹⁰ 	<ul style="list-style-type: none"> Instant relief in just 60 seconds with dab-on application¹¹ Twice-daily brushing helps your patients maintain effective relief in the long term¹² Strontium acetate formulation creates deep acid-resistant occlusion of dentine tubules^{13,14} 	<ul style="list-style-type: none"> An advanced formulation delivers clinically proven relief and around the clock protection from dentine hypersensitivity^{15,16} Low abrasion, SLS*-free and a fresh new flavour
		
		<p>Think sensitivity, think SENSODYNE</p>

COMMITTED TO
SIMPLY DOING MORE
FOR DENTAL PROFESSIONALS

Dr Una Lally receives the Moloney Award from Dr Paddy Crotty in 2011.

Dr Joe Moloney Award

This year sees the continuation of the Dr Joe Moloney Award, kindly sponsored by the Dental Health Foundation. This award will be given to the presentation judged as Best Table Demonstration by a panel of judges. A magnificent glass trophy will be awarded in perpetuity. We are also asking all those who are willing to present to note that the format specifies a practical demonstration that will recycle in five minutes or less rather than a mini-lecture presentation. A poster presentation, while welcome, will not be eligible for the Award.

Dr Conor McAlister with Elaine Shore and Karen Grealis from the Dublin Dental School and University Hospital, the winners of the Costello Medal in 2011 in Cavan, and Mrs Jackie Costello.

Tony Costello Memorial Medal

The competition for the Tony Costello Memorial Medal will be judged on a Table Demonstration or Poster Presentation of not more than 10 minutes on a subject applicable to general dental practice. Each of the three dental schools may enter a team of a maximum of two people. The presentation will be judged on:

- clinical usefulness;
- academic content;
- presentation; and,
- originality.

The Irish Dental Association will make a grant of €400 per demonstration.

SATURDAY 19 MAY FROM 2PM

Moloney Award 2012 Entrants

(at the time of going to print. Further applications welcome)

Dr Claire Curtin

Oral care for dependent, dysphagic and seriously ill elderly patients
- Introducing oral care plans and aspirating toothbrushes

Dr Saoirse O'Toole

Reducing the inequalities in treatment need between methadone patients and the general adult population in Ireland

Dr Emmett Hegarty

Altnagelvin Hospital Oral and Maxillofacial Surgery Department –
A Cross Border Service.

Dr Emily Clarke

Tips and *tips* for ultrasonic scaling and root planning

CPR Stations

CPR is a mandatory requirement for continuing dental education. All registered delegate will have the opportunity to take part in a CPR Course on Friday 18 May and Saturday 19 May. Delegates must register for the CPR Courses at the registration desk at the conference. All members of the dental team are welcome.

Welcome to the future of dental practices

MacPractice provide the most cutting edge solutions for all your dental needs

MacPractice
The COMPLETE Mac Solution for a Dentist's Office

MacPractice is a best-of-class Mac dental software application, creating a new choice of practice management and clinical software for all dentists. MacPractice gives dentists access to high quality software at a reasonable cost and MacPractice backs this up with a full spectrum of complementary, integrated software and hardware solutions and associated support services.

"Our MacPractice system is fast, extremely stable and very easy to navigate. I especially like the ability to view instantaneous real-time reports and analyses."

MacPractice User, London.

"MacPractice is a very clever, stylish, user friendly system that allows huge detailed input. Apple screen quality for imaging and radiographs is outstanding."

MacPractice User, Dublin.

DR RONAN ALLEN

Ronan qualified from Trinity College Dublin in 2002, and after a year as house officer in the Dublin Dental School, moved into general dental practice in Dublin. He attained his membership examinations from the RCSI before completing a three-year masters programme in periodontology and implant dentistry at the University of North Carolina. He works in practice limited to periodontics and implant dentistry in the Burlington Dental Clinic, and teaches the CPD course in periodontology at the Dublin Dental School. He is a member of the Irish Society of Periodontology and the American Academy of Periodontology.

DR DERMOT CANAVAN

Dermot is a graduate of the Dublin Dental School and Hospital. He completed his residency training in orofacial pain management at the University of California in 1994, in addition to a masters in oral biology. He maintains a private practice in Dublin and lectures part-time at the Dublin Dental School. He has written chapters on orofacial pain management for a variety of textbooks and published several peer-reviewed articles. He is a former president of the Irish Pain Society and the Metropolitan Branch of the IDA, and is deputy editor of the *Journal of the Irish Dental Association*.

DR MAIREAD CASHMAN

Mairead obtained her dental and medical degrees from UCC in 1990 and 1996, respectively. Following her medical degree, she completed the general surgery training programme in Cork University Hospital. She spent six years on the London Higher Surgical Training Programme in Oral and Maxillofacial Surgery. In 2004, she was appointed Consultant Oral and Maxillofacial Surgeon at Northwick Park Hospital. In 2006 she returned to Cork, and is now working in private practice as an oral and maxillofacial surgeon.

PROF. LUKE CLANCY

Luke is a Consultant Respiratory Physician. He established St James's Hospital in Dublin as a significant tertiary referral centre for respiratory diseases, and was Medical Director of Peamount Hospital from 1981 to 2004. He has published on asthma, chronic bronchitis, lung cancer, sarcoidosis, pneumonia, air pollution, tuberculosis and immunisation. His research is now exclusively on tobacco control (TC). He directs some 14 national projects and is a partner in five EU-funded and two international projects funded by NCI/HRB and HEI USA concerned with TC. He also co-ordinates a €3m FP7 project on TC called PPACTE.

DR PAT CLEARY

Pat graduated from Trinity College Dublin in 1981 with a BDentSc. Following a term as House Surgeon in the Dublin Dental Hospital, he practised in Portlaoise and then in England. He undertook postgraduate studies at Indiana University School of Dentistry from 1984 to 1986 and was awarded a certificate and masters degree in endodontics. On returning to Ireland in 1986 he set up his practice limited to endodontics in Booterstown, which he maintains to the present day. He was President of the IDA in 2005 and has presented at numerous meetings in Ireland and Europe.

DR EDWARD COTTER

Edward graduated from Trinity College in 1988, followed by a year as a house surgeon in the Dublin Dental Hospital and two years in general practice in Co. Down, and also part-time in the Royal Victoria Hospital in Belfast. He gained graduate training in prosthodontics at the University of Iowa, and then a Fellowship in Prosthodontics at The Veteran's Administration Hospital in Iowa City, and a Fellowship in Maxillofacial Prosthetics and Dental Oncology at MD Anderson Cancer Centre, Houston, Texas. Edward is in practice limited to prosthodontics, maxillofacial prosthetics and dental oncology in Dublin.

DR EAMON CROKE

Upon qualifying from Dublin University in 1979, Eamon worked in general practice in the NHS from 1980 to 1991. He undertook an MSc (Prosthetics) in the Eastman Dental School and Hospital, where he received the Dentsply Award. Since returning to Ireland he has worked in private practice and lectures in the Dublin Dental School and Hospital. He was honoured to be President of the Metropolitan Branch of the Irish Dental Association from 2004 to 2005 and has been a member of the Dental Council since 2005. He is currently President of the Dental Council.

DR TIM DONLEY

Tim graduated from the University of Notre Dame, Georgetown University School of Dentistry, and completed a general practice residency. He received his masters degree in periodontics from Indiana University. He is the former editor of the *Journal of the Kentucky Dental Association* and is an adjunct professor of periodontics at Western Kentucky University. He is a lecturer with the ADA Seminar Series. *Dentistry Today* recently listed him among its leaders in continuing education. He is currently in private practice limited to periodontics and implantology in Bowling Green, KY.

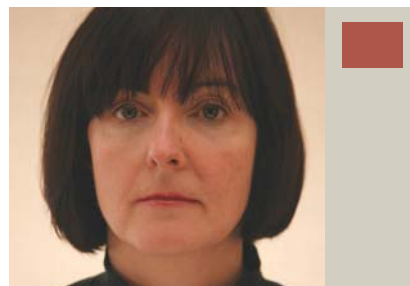

DR BRENDAN FANNING

Brendan graduated from TCD in 1981, and received an MSc in Dental and Maxillofacial Radiology from the University of London in association with King's College London in 2007. He works in general dental practice in Ashford, Co. Wicklow, and dental radiology practice in Dublin. He is a member of the European Academy of Dento-Maxillofacial Radiology and the British Society of Dental and Maxillofacial Radiology. He has presented at a number of national and international conferences. He has published papers on optimisation and justification in dental radiology in the *Journal of The Irish Dental Association*.

DR JANICE FEARNE

Janice is Consultant and Clinical Lead for Paediatric Dentistry at Barts and the London NHS Trust. She qualified from Kings College Dental Hospital and is on the Specialist list in Paediatric Dentistry. Her main research interest is in developmental defects of the dentition, in which she completed a PhD in 1995. She also has a significant role in specialist training, and has been a member of the Specialist Advisory Committee, Chairman of the Intercollegiate Fellowship Board and a member of the working party for Curriculum Development for Specialist Training in the UK.

DR JOHANNA GLENNON

Johanna qualified in Dublin in 1984 and worked for eight years in general practice in the National Health Service in the UK. During that time, she held a clinical assistant post at the Oral Surgery Department in Boston, Lincolnshire. Johanna completed her Masters in Endodontics at the University of London in 1994. Since then she has been in practice limited to endodontics and is a part-time clinical lecturer at DDH. She is also a tutor on the endodontic module of the Diploma in Clinical Dentistry.

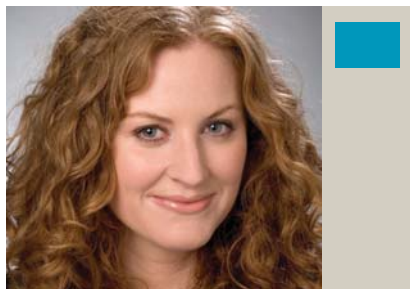

DR STEVE GEIERMANN

Steve is a retired Captain in the US Public Health Service, and joined the American Dental Association's Council on Access, Prevention and Interprofessional Relations in 2008 as Senior Manager for Access, Community Oral Health Infrastructure and Capacity. A graduate of the University of Michigan School of Dentistry, he previously worked with the Indian Health Service and in community health centres before developing national programmes to recruit and retain dentists and other healthcare workers, while assisting communities to develop systems of care to increase access for underserved populations. He currently advises the US National Oral Health Alliance.

DR RYAN HENNESSY

Ryan qualified from Trinity College Dublin in 2006. He worked as an associate in several practices in Dublin, Wicklow and Wexford before opening his own dental practice in July 2010 in his home county of Tipperary. He is an active member of the IDA General Practitioners Committee and has been involved in DTSS discussions with the HSE.

MS TINA LEONARD

An independent consumer expert, Tina is Ireland's foremost consumer champion. She dispenses consumer advice and information weekly on RTÉ's Four Live, on RTÉ Radio 1's Today with Pat Kenny and via her weekly 'Smart Consumer' column in the *Irish Independent*. Formerly Director of Ireland's European Consumer Centre, Tina is the author of *Your Consumer Rights in Ireland*.

DR KEVIN LEWIS

Kevin qualified from The London Hospital in 1971. He spent 20 years in full-time general dental practice and 10 years practising part-time. He became involved in the dento-legal field in 1989, firstly as a member of the Board of Directors of Dental Protection, then as a dento-legal adviser, and since 1998 as Dental Director. He became a member of the Council (Board of Directors) of the Medical Protection Society in 2003 and is a member of their senior management team. He writes and lectures all over the world, including at seven FDI World Dental Congresses.

DR NICK LEWIS

Nick graduated in Newcastle, and completed his MFDS at RCS Edinburgh and restorative higher specialist training at the Eastman Dental Hospital. He completed an MSc in conservative dentistry in 2006, and obtained the intercollegiate specialty fellowship examination in restorative dentistry from the Royal College of Surgeons of England in 2008. He maintains a private practice in Hampshire. He is currently a Consultant in Restorative Dentistry and Clinical Lead in Prosthodontics at the Eastman Dental Hospital and a tutor and lecturer for the Royal College of Surgeons FGDP Diploma in Restorative Dentistry.

MR FRANK MEYER

Frank studied dental surgery in Utrecht for three years and subsequently dental technology solutions in the Institute Vakopleiding Technic (IVT) in Germany. Frank keenly supports continuous research and development. With 25 years' experience of laboratory techniques covering implant technologies, crown, bridgework and specialised dental solutions, Frank established @mire 3D Dental, the only Irish full end-to-end in digital dentistry using CAD/CAM technology that can accept, design, mill and support the chair-side oral scanner.

DR PADRAIG McAULIFFE

Padraig graduated from UCC in 2002 and became a Member of the Royal College of Surgeons of England in 2004. In 2007 he started full-time specialist training in prosthodontics in Trinity College Dublin, graduating in 2010. After finishing his graduate training Padraig worked in Montreal, where he gained further expertise on bruxism and the dental management of sleep apnoea. In addition to clinical practice, he is also involved in research focusing on bruxism at Trinity College, in collaboration with the Department of Bioengineering. His work on bruxism has been published in international journals and has won international awards.

LEADING REGENERATION

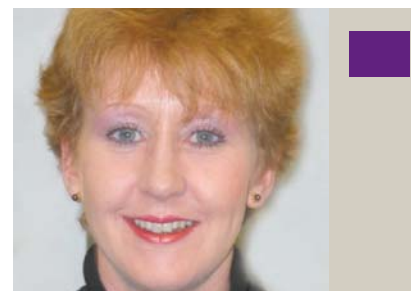

DR CHRISTINE MCCREARY

Christine graduated in dentistry and medicine from Trinity College Dublin. She completed her higher training in Dublin and worked as a senior lecturer/consultant in oral medicine in the Dublin Dental School and Hospital. She then took a senior lecturer/consultant post in the dental school in Cork. She served on the Irish Dental Council from 2005 to 2010 and was Chair of the Education Committee. She has served on the Board of the Faculty of Dentistry in the RCSI, was recently re-elected to this board and is current chair of the Education Committee.

DR DON MORROW
DR JENNIFER IRWIN

Don has a PhD in health sciences and over 25 years' experience as a professor in Canadian universities. He is a certified professional coach trained and accredited with the Coaches Training Institute and the International Coach Federation, a widely published author, an experienced presenter, and runs a small individual- and relationship-coaching practice. Jennifer is a health behaviourist and certified professional life coach accredited with the Coaches Training Institute and the International Coach Federation. She is a published author, workshop facilitator, and award-winning researcher and university professor. She has experience working with and presenting to individuals and groups.

MS MARY O'DONNELL

Mary qualified as a dental nurse from the Dublin Dental University Hospital (DDUH) in 1985 and was appointed Dental Nurse Tutor in 1992. She completed an MSc in Trinity College Dublin in 2002 and then joined the DDUH Microbiology Unit as an experimental officer in microbiology. She was promoted to senior experimental officer in microbiology in 2005, and began research towards a PhD, which she was awarded in 2009. Mary has published widely on biofilm management in dental units and is an acknowledged authority in the field.

DR EDWARD O'REILLY

Edward qualified from Trinity College Dublin in 1997. He commenced a junior house officer role in the Dublin Dental Hospital, which was followed by both general dental practice and a senior house officer post. Having completed the membership exams to the RCSI in 2001, he then completed the three-year full-time Masters Programme in Prosthodontics at the Dublin Dental School. He now works in private practice limited to prosthodontics and implant dentistry in Dublin, while maintaining a part-time faculty teaching position in the Restorative Department in the Dublin Dental Hospital and School.

DR YUSOF (JOE) OMAR

Joe qualified as a doctor from Cairo University in 1976. He left the NHS in 1984 to establish a private practice in dental anaesthesia/sedation for dentistry in Harley Street in London, and is now a senior partner in Sedation Solutions, a practice of dedicated sedationists. Joe is a clinical lecturer in sedation at the Eastman Dental Institute. He has lectured on medical emergencies for dental personnel for over 25 years. Joe served on the Standing Committee for Sedation in Dentistry from 2007 until 2010. He is currently a Council member of the Association of Dental Anaesthetists.

DR GEORGE PRIEST

George lectures nationally and internationally while maintaining a full-time prosthodontic practice in Atlanta, Georgia, devoted to aesthetic, advanced restorative and implant dentistry. He is a regular contributor to notable restorative and implant journals. He is a Diplomate of the American Board of Prosthodontics, a Fellow of the American College of Prosthodontists and a Fellow of the International College of Dentists. He has been an innovator and teacher of implant and aesthetic dentistry for more than 20 years, remaining in the forefront of technology and education.

ANKYLOS® | DENTSPLY
FRIADENT

This Works...

For a quarter of a century ANKYLOS® implants have been helping dental professionals recreate beautifully natural smiles.

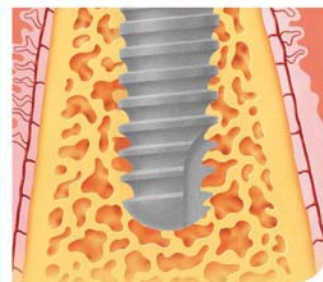

The lasting natural aesthetics and long-term stability of restorations supported by ANKYLOS® implants result from the strength and integrity of the TissueCare Connection. The conical taper connection between the implant and the abutment is so tight they become effectively a single unit. And the avoidance of both microbial and mechanical irritation underpins the long-term health of the surrounding bone and soft tissue. Restoration is simple – with a unique choice of indexed and non-indexed prosthetic components.

...let ANKYLOS® work for you

"...ANKYLOS is one of the best designed implant systems available, because of the unique conical connection. Outstanding aesthetic results are achievable due to the soft tissue response."

Dr Nigel Saynor, Bramcote Dental Practice

DENTSPLY Friadent UK & Ireland

Unique
reciprocating
design.

**With WaveOne™, you only need
one rotary file in 90% of cases*.**

In most cases, the WaveOne system from DENTSPLY uses only one rotary file to complete a root canal treatment. Using reciprocating technology, it only shapes the canal when gentle pressure is applied, giving you absolute control.

Small things. Big difference.

MS SHEILA SCOTT

Sheila has been helping UK dentists to achieve success and profit for over 20 years, and in the past year has helped many Irish dentists to keep their practices financially stable and busy. Her focus is on the bottom line and making sure practices deliver what patients really appreciate, gaining trust and loyalty. The practices she has worked with so far have reported increased patient attendance, and that they are 'holding their own' in these difficult times. Sheila is qualified in psychology, marketing, counselling and training.

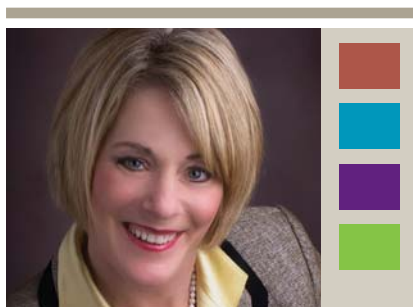

DR ANDREW SMITH

Andrew qualified from the University of Wales in 1987. He was awarded a PhD in 1994, FDS RCS in 1995 and an MRCPATH in microbiology from the Royal College of Pathologists in 2000. In 2005 he passed the advanced course in sterilisation technology run by the Institute of Healthcare Engineers and Estate Managers. In 2005 he was appointed Head of the Diagnostic Oral Microbiology Laboratory and is also lead Microbiology Consultant for Decontamination in NHS Glasgow & Clyde. In 2010 he was awarded a Personal Chair in Clinical Bacteriology at the University of Glasgow.

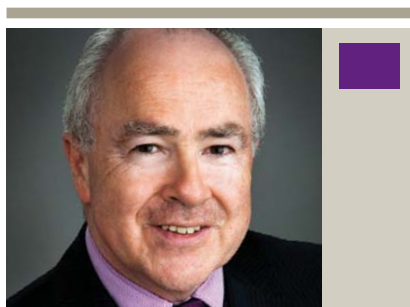

PROF. LEO STASSEN

Leo is Professor of Oral and Maxillofacial Surgery in Trinity College Dublin, based in St James's Hospital and the Dublin Dental School and Hospital. He has been Programme Director, Oral and Maxillofacial Surgery, since 2004, and Oral Surgery since 2005. He was editor of the *British Journal of Oral & Maxillofacial Surgery* from 1996 to 1997, and has been editor of the *Journal of the Irish Dental Association* since 2005.

MS BETHANY VALACHI

Bethany is a physical therapist, dental ergonomic consultant and author of the book *Practice Dentistry Pain-Free: Evidence-based Strategies to Prevent Pain and Extend your Career*. She is CEO of Posturedontics®, a company that provides research-based dental ergonomic education, and clinical instructor of ergonomics at OHSU School of Dentistry in Portland, Oregon. She lectures internationally and has provided expertise on dental ergonomics to faculty and students at numerous dental universities. Bethany has been widely published in over 50 peer-reviewed dental journals and has developed patient positioning and exercise videos specifically for dental professionals.

DR JOHN WALSH

John graduated from Trinity College Dublin in 1974. A scholarship from the American Dental Society of Europe enabled him to study at Indiana University, where he graduated with a masters degree in paediatric dentistry in 1977. He obtained a Masters Degree in orthodontics from the University of Washington in 1986. In 1989 he became a Diplomat of the American Board of Paediatric Dentistry. He is a Fellow of the RCSI and is currently Vice Dean of the Faculty of Dentistry at the RCSI. He is in private practice in Dublin and Naas.

DR SIMON WOLSTENCROFT

Simon graduated from Cardiff and spent five years in general dental practice. He completed three years in oral and maxillofacial surgical units before returning to Cardiff to undertake orthodontic specialty training. He completed consultancy training in Birmingham Dental Hospital while undertaking a diploma in healthcare management. He teaches orthodontics in the Dublin Dental Hospital and examines for the Royal College of Surgeons of Edinburgh Membership in Orthodontics. He is Chairman of the RCSI's Orthodontic Advisory Committee. He works as a consultant orthodontist in St James's Hospital, Dublin, and holds private clinics in Dublin and Dunshaughlin.

Please return completed form to:
Irish Dental Association,
Unit 2 Leopardstown Office Park,
Sandyford,
Dublin 18.

Watch out! Chewing Extra Ice neutralises nasty plaque acids.

Oh crumbs!

Teeth need extra protection after eating and drinking, especially when people are on the go and can't brush.

That's why many dentists and hygienists are recommending sugarfree gum, because it removes food debris, neutralizes harmful plaque acids and restores pH balance in the mouth. And chewing gum is a preferred treatment for xerostomia because it increases sufferers' salivary flow by up to seven times.

Give your patients some extra advice: after eating and drinking chew Wrigley's Extra Ice sugarfree gum with Xylitol to help fight plaque acid attacks and for clean and healthy teeth.

For more information or to order free samples for your patients visit

www.wrigley.com/uk/oralhealth

Chew. Enjoy. Bin 

All-on-4™

The efficient treatment concept with immediate loading.

All-on-4 was developed to provide clinicians with an efficient and effective restoration using only four implants to support an immediately loaded full-arch prosthesis.* Final solutions include both fixed and removable prostheses such as NobelProcera Implant Bridge Titanium or Implant Bar Overdenture. The tilted posterior implants help avoid relevant anatomical structures, can be anchored

in better quality anterior bone and offer maximum support of the prosthesis by reducing cantilevers. They also help eliminate the need for bone grafting by increasing bone-to-implant contact. All-on-4 can be planned and performed using the NobelGuide treatment concept, ensuring accurate diagnostics, planning and implant placement.

Nobel Biocare is the world leader in innovative and evidence-based dental solutions. For more information, call + 44 (0) 208756 3300 (UK), 1800 677306 (Ireland) or visit our website.
