HANDS-ON COURSES

Hands-on practical endodontic course

Kerr™

Together, we're more.™

PREDICTABLE SUCCESS IN ENDODONTIC TREATMENT

This half day hands on course is aimed at general practitioners with a special interest in endodontics.

FOLLOWING THIS COURSE CLINICIANS WILL:

- be able to make suitable access cavities in molar teeth for endodontic treatment;
- learn to create glide path access in preparation for NiTi rotary preparations;
- learn to use the Twisted File Adaptive (TFA) NiTi system and understand its benefits, limitations and correct procedures to understand this easy NiTi system;
- learn to obturate in warm vertical continuous wave motion using the latest Elements Free Obturation system; and,
- learn to complete the post endo restoration using the innovative SonicFill composite system.

Lynda Elliot

Lynda graduated from Trinity College, Dublin with an honours degree and following a year as House Surgeon in the Dublin Dental Hospital, spent several years in general practice in the UK. She completed her masters in endodontics in 1995 in Guy's Hospital, London and subsequently returned to Dublin and established the Crescent Clinic Endodontic practice in Clontarf in 1999. Lynda has been President of the European Society of Endodontology, President of the Metropolitan Branch of the IDA and on various advisory and dental committees. Lynda has lectured and given hands-on courses throughout Ireland and abroad.
