

IDA Annual Conference

The Galmont Hotel | Galway | April 4-6, 2019

NAVIGATING OUR FUTURE

Introducing **next generation technology**
to help patients achieve Whole Mouth Health*¹

New technology

Superior **proactive protection***
of teeth, tongue, cheeks, and gums.

New Colgate Total® with Dual-Zinc + Arginine.
Reinvented to proactively work with the biology
and chemistry of the mouth.

- Superior reduction of bacteria on 100% of mouth surfaces (teeth, tongue, cheeks and gums), 12 hours after brushing*¹
- Weakens to kill bacteria
- Creates a protective barrier on hard and soft tissue to protect against bacterial regrowth

For better oral health outcomes,[†] advise your patients about New Colgate Total®

*Statistically significant greater reduction of cultivable bacteria on teeth, tongue, cheeks, and gums with Colgate Total® vs non-antibacterial fluoride toothpaste at 4 weeks, 12 hours after brushing.

[†]Significant reductions in plaque and gingivitis at 6 months vs non-antibacterial fluoride toothpaste; $p < 0.001$.²

PRESIDENT'S WELCOME

Fáilte go Gaillimh 2019!

The Annual Conference 2019 returns to the City of the Tribes on Ireland's beautiful Atlantic coast. This is a fantastic opportunity to bring along your dental team for a fun, sociable and educational team-building experience. Navigating the Future will be a conference with a difference!

I am very grateful to this year's Conference Committee, chaired by Dr Dermot Canavan (Dr Aoife Crotty, Dr Maurice Fitzgerald, Dr Alastair Woods, Dr Helen Walsh, Dr Danny Collins and Elaine Hughes) who have put together a world-class scientific programme for this year's event. We are extremely fortunate to have world-recognised experts such as Prof. Van Haywood, Dr Shane White, Dr Frank Lobbezoo and Prof. Avi Banerjee, as well as many more. The very best of local Irish talent will also present over the three days, including Mr Conor Barry, Dr Paul Quinlan, Dr Pat Cleary, Dr Seamus Sharkey and Dr Claire Healy.

We will of course have two programmes running simultaneously on Friday and Saturday so delegates can choose which programme to attend. A full dental nurses' programme will take place on Saturday.

This year I am particularly delighted to welcome Dr Niamh O'Sullivan, Professor Emerita of Visual Culture (National College of Art and Design, Ireland), and founding Curator of Ireland's Great Hunger Museum, Quinnipiac University, Connecticut, who will give what I believe to be a fascinating lecture on The Great Famine. She has curated many exhibitions, including the Famine exhibition, Coming Home: Art and the Great Hunger, which attracted almost 100,000 visitors last year.

As every year, the dental trade show will showcase new and advanced products, equipment and technology from the dental industry. All members of the dental team will have the opportunity to discuss new products and various advancements in services with our dental trade colleagues.

2019 will see the continuation of the Annual GP Meeting at 1.00pm on Friday, April 5 – all IDA GPs are welcome to attend. This year the GP Group will also have its AGM during this time slot.

Our golfers can look forward to our annual President's Prize at Galway Golf Club on Thursday, April 4, and we also have some tee times available on Wednesday for those who are doing a pre-Conference course on Thursday. Don't forget our Annual Dinner on Friday night at the Galmont Hotel. All are welcome. Remember to include Navigating our Future in your calendar of events for 2019.

I look forward to seeing as many colleagues and team members as possible in April!

FÁILTE ÓN UACHTARÁN

Fáilte Romhaibh don nGaillimh, 2019

Filleann an Comhdháil bliantúil i 2019 ar Chathair na dTreabh ar chósta álainn Atlantach na hÉireann. Is deis iontach í seo, do fhoireann fiacloireachta a bhreith leat don ócáid taitneamhnach cuideachtúil agus oideachasiúil. Beidh an comhdháil 'Ag Treorú an Todhchaí' mar comhdháil ar leith againn.

Táimse thar a bheith buíoch do Chomhairle na Comhdhála i mbliana, is an Chathaoirleach An Dr Diarmuid Ó Canabháin (An Dr Aoife Ní Chrotaigh, An Dr Muiris Mac Gearailt, An Dr Helen Breathnach, An Dr Domhnall Ó Coileáin agus Elaine Nic Aodha) atá tar éis clár eolaíochta den gcéad scoth a chur le chéile don gComhdháil i mbliana. Tá an t-ádh dearg linn go mbeidh saineolaithe domhanda le clú agus cáil orthu mar Van Haywood, Shane White, Frank Lobbezoo agus Avi Banerjee, is a thuilleadh nach iad inár dteannta. Beidh scoth na nGael i láthair thar trí lá, ina measc An Dr Pól Ó Cuinnleáin, An Dr Pádraig Ó Cléirigh, An Dr Séamus Ó Searcaigh agus An Dr Claire Ní Éalaithe, i dteannta mórán eile.

Beidh dhá chlár ag feidhmiú arís ag an am céanna ar an Aoine agus Satharn. Beidh na baill in ann a rogha clár a leanúint. Beidh an clár iomlán d'altraí déidliachta ar siúl ar an Satharn.

I mbliana, táim ar bís chun cuireadh a thabhairt don nDr Niamh Ní Shúilleabháin, Ollamh Emerita de Chultúr Físe (Coláiste Náisiúnta Ealaíona agus Dearadh, Éire) agus léiritheoir de Mhúsaem Ghorta Mhór na hÉireann, Quinnipiac, Connecticut, a thabharfaidh léacht suimiúil ar an nGorta Mhór. Tá sí tar éis an-chuid taispeántais a eagrú, ceann an Ghorta Mhóir ina measc, 'Ag filleadh abhaile: Ealaín agus an Ghorta Mhór'. Bhí nach mór 100,000 cuairteoirí ag an taispeántas seo anuraidh.

Mar a bhíonn gach aon bhliain, beidh an seó trádála ag taispeáint táirgí nua, uirlisí agus teicneolaíocht ón dtionscail fiacloireachta. Beidh deis ag an bhfoireann ar fad cúrsaí a phlé leis na comhlachtaí seo.

Beidh cruinniú bliantúil dos na fiacloirí ginearálta ar an Aoine, 5 Aibreán ag 1.00 i.n. Beidh fáilte roimh gach fiacloir ón gCumann. Beidh an cruinniú ginearálta bliantúil ag an ngrúpa seo ag an am céanna.

Beidh lucht gailf ag súil le dúis bliantúil an Uachtaráin ag Club Gailf na Gaillimhe ar an nDéardaoin, 4 Aibreán agus tá cúpla spás ann ar an gCéadaoin dóibh siúd a bheidh gafa le cúrsaí réamh-chomhdhála ar an nDéardaoin.

Ná dein dearmad ar an nDinnéar Bliantúil oíche Dé hAoine ag Óstán Galmont. Fáilte roimh chách. Dein deimhin de 'Treorú an Todhchaí' a chur sa dialann i 2019.

Táim ag tnúth leis an méid is mó d'fhiaclóirí agus a bhfoirne a fheiscint ann i Mí Aibreán.

Prof. Leo Stassen
President Elect

PLAQUE CONTROL: 'GOOD' CAN BE BETTER

THE PROVEN ORAL CARE COMBINATION

A combined analysis of 29 clinical studies on essential oils has been published in the *Journal of the American Dental Association*.

This showed that after 6 months of using **LISTERINE**®, after brushing and inter-dental cleaning, **37%** of patients had at least half their mouth free from plaque, compared with only **5.5%** of those who just brushed and used inter-dental cleaning.¹ **LISTERINE**® contains a unique anti-plaque agent, 4 powerful essential oils. These penetrate the plaque biofilm to kill **97%** of bacteria left behind after brushing.² For some patients 'good' can be better.

To see the full study visit [http://jada.ada.org/article/S0002-8177\(15\)00336-0/abstract](http://jada.ada.org/article/S0002-8177(15)00336-0/abstract)

INTRODUCTION

Registration

All delegates must register to attend any part of the Conference at the registration desk. No guests or unregistered delegates are permitted to access any part of the Conference area including the trade show area. The registration desk will be open at the following times:

- Thursday 8.30am – 3.00pm (for pre-Conference bookings only)
- Friday 8.00am – 4.00pm
- Saturday 9.00am – 3.00pm

GP MEETING

A GP meeting for all IDA members will take place from 12.00pm – 1.00pm on Friday, April 5. All IDA members welcome.

CONFERENCE BADGES

Please wear your name badge at all times in the Conference areas. Conference badges must be shown/worn in order to access any lecture hall or trade show area.

ANNUAL DINNER

The Annual Dinner will take place on Friday, April 5, in the Inis Mór Suite of the Galmont Hotel. A drinks reception will take place in the front foyer at 7.00pm. Dress code is black tie. A seating plan will be in use.

ADA C.E.R.P.® | Continuing Education Recognition Program

Irish Dental Association is an ADA CERP Recognised Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Irish Dental Association designates this activity for 11.5 continuing education credits. (Friday and Saturday)

CONFERENCE COMMITTEE

Dermot Canavan,
Chair

Daniel Collins

Aoife Crotty

Maurice Fitzgerald

Elaine Hughes

Helen Walsh

Alastair Woods

PROGRAMME COLOUR CODE AND CONTENTS

PRE-CONFERENCE PROGRAMME	6
CONFERENCE	9
DENTAL NURSES' PROGRAMME	10

A dedicated nurses' programme will take place on Saturday, April 6. Dental hygienists and practice managers are welcome to attend any of the sessions.

Root to tip – endodontic and restorative treatment revisited

Dr Pat Cleary

Full-day hands-on course

Endodontic treatment is an area of dentistry that requires: a) an investigative mind, in order to determine an accurate diagnosis; b) a science-based mind to assist in a biological approach to treatment; c) an artist's appreciation of preparation; and, d) an engineer's approach to restoration. This hands-on course will cover all these areas.

Learning objectives:

- make a definitive endodontic diagnosis;
- understand the cause of the problem and what is required for a successful outcome;
- embrace the art of endodontics; and,
- decide the requirements for the restoration of an endodontically treated tooth.

The art and science of posterior composites

Dr Ian Cline

Half-day hands-on course

Direct posterior composites have become commonplace in general dental practice. However, clinical experience and studies have shown that compared to dental amalgam they can create problems such as sensitivity, secondary caries and food packing due to poor contact areas. Ian believes in the philosophy of 'Better, Safer and Faster' when it comes to composite placement. In his presentation and hands-on session, Ian will present practical solutions to everyday problems, and show how applying the theory can lead to clinical success.

Learning objectives:

- to discuss the latest concepts in posterior composites;
- to appreciate strategies for dealing with the main problems that dentists have with posterior composites, including the use of rubber dam, sectional matrices and bulk-fill techniques;
- "C-Factor" – why is it important and steps to minimise its influence;
- how to assess the occlusal scheme and build the restoration to minimise adjustments;
- to be able to select appropriate instrumentation for placement and manipulation of composite;
- to simplify finishing and polishing of posterior composites;
- to look at the management of posterior root-filled teeth and how SDR flow+ and ceramic onlays may be the best solution;
- uses of the deep marginal elevation (DME) technique; and,
- hands-on, Class I restoration, and Class II restoration with use of a sectional matrix system.

Achieving compliance – frequently asked questions

Drs Eamon Croke and Nick Armstrong

Chair: Dr Jane Renehan

90 minutes

This interactive workshop aims to examine the topic of achieving compliance by answering the most frequently asked questions. Based on their wide range of compliance experience, the presenters will demonstrate that simple solutions are normally the best solutions!

Participants will gain insight into: 1) the recently published HIQA infection control standards; 2) the Health and Safety Authority's Guidance on Hazards in Dentistry; and, 3) Dental Council Codes of Practice.

As delegates will be invited to submit compliance queries in advance of the workshop additional topics may be included. The workshop is recommended for dentists, dental hygienists, practice managers and senior dental nurses.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the Best Practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

Facial aesthetics - botulinum toxin

Dr Brian Franks

Full-day lecture + live demonstration

With the population becoming more aesthetically aware, cosmetic dentistry and now facial aesthetics are rapidly developing disciplines within the dental profession. Dental professionals are the ideal healthcare practitioners to combine non-surgical facial aesthetics with dental aesthetic treatments to provide a total 'facial aesthetic' outcome. Upper face injections with botulinum toxin are the most popular non-surgical cosmetic treatments worldwide. The use of botulinum toxin for treatments specific to dentistry, for example bruxism and gummy smiles, will also be discussed, followed by live demonstrations.

Learning objectives

Attendance at this session will provide an understanding of:

- the importance of knowledge of the anatomy of the muscles when providing botulinum toxin injections;
- the importance of the consultation process to ensure that patients are sufficiently informed about the treatment choices and are appropriate patients to receive treatment;
- identifying contraindications for botulinum toxin treatment;
- identifying the various injection techniques;
- identifying the risks of providing botulinum toxin treatment;
- the importance of continually updating your knowledge and skills; and,
- the importance of receiving appropriate training.

Getting started in digital dentistry

Drs Maurice Fitzgerald and Alastair Woods

Half-day hands-on lecture

Without doubt the future of all dental practice lies with digital technologies. This half-day course aims to give a detailed overview to the participant of the current landscape and the future of dental digital technologies. Emphasis will be placed on:

- practical integration into dental practice;
- the benefits and limitations of the technologies;
- economic pros and cons;
- hands-on time with intra-oral scanners and 3D printers; and,
- hands-on time with the associated software packages.

The course is designed to leave the participant more confident in making the switch to digital dentistry, and more assured of making the correct investment in these exciting and disruptive technologies.

6.00pm – IDU Annual General Meeting and IDA Annual General Meeting followed by trade show party.

Friday, April 5

ANNUAL PRESIDENT'S DINNER 2019

7.00pm Drinks reception

8.15pm Dinner followed by dancing to Frankly Sinatra

TICKETS €85

All dental team members, trade members and friends welcome

CONFERENCE PROGRAMME

FRIDAY APRIL 5

PROGRAMME 1	INIS MÓR 2	PROGRAMME 2	INIS MÓR 3
9.00am – 10.00am	Aesthetic and functional direct restorations Ian Cline 	9.00am – 10.00am	Bleaching single dark teeth externally and internally Van Haywood 
10.00am – 11.00am	How to predictably restore and replace teeth Paul Quinlan	10.00am – 11.00am	Psychosocial value of root canal treatment Shane White 
11.00am – 11.30am	COFFEE BREAK	11.00am – 11.30am	COFFEE BREAK
11.30am – 12.00pm	Advanced crown and bridge digital restorative solutions Ashley Byrne 	11.30am – 12.00pm	Oral mucosal disease and what to refer Claire Healy
12.00pm – 1.00pm	GP MEETING	12.00pm – 1.00pm	Introduction to non-surgical facial aesthetics: why, who, where, how, when, when not and the JOY! Brian Franks
1.00pm – 2.00pm	LUNCH	1.00pm – 2.00pm	LUNCH
2.00pm – 2.45pm	Take the tooth – not the bone: avoiding complications in oral surgery Seamus Rogers	2.00pm – 2.45pm	Dental sleep medicine: an emerging dental discipline Frank Lobbezoo
2.45pm – 3.30pm	Avoiding complications of another type Martin Foster 	2.45pm – 3.30pm	Bruxism: friend or foe? Frank Lobbezoo
3.30pm – 4.00pm	COFFEE BREAK	3.30pm – 4.00pm	COFFEE BREAK
Both programmes will merge for the last two presentations – two fascinating speakers/topics not to be missed by any dental team member.			
4.00pm – 4.45pm	Approaches to challenging consultations Ciara Doherty		
4.45pm – 5.45pm	Representing the unrepresentable – The Great Hunger Niamh O'Sullivan		

CONFERENCE PROGRAMME

SATURDAY APRIL 6

9.00am – 9.45am		The oral microbiome in health and disease – an ecological perspective		Colgate	
		Prof. Philip Marsh			
PROGRAMME 1		INIS MÓR 2		PROGRAMME 2	
10.00am – 11.00am		Tooth enamel: of mice and men Shane White		10.00am – 11.00am Endodontic microsurgery: the ultimate tooth-saving treatment - Part I Daniel Flynn	
11.00am – 11.30am		COFFEE BREAK		11.00am – 11.30am COFFEE BREAK	
11.30am – 12.00pm		Advanced prosthetic and denture digital solutions Ashley Byrne		11.30am – 12.00pm Endodontic microsurgery, the ultimate tooth- saving treatment- Part II Daniel Flynn	
12.00pm – 1.00pm		Preparation design – today’s relevance! Seamus Sharkey		12.00pm – 12.30pm Perio update for daily practice Rachel Doody	
				 	
1.00pm – 2.00pm		LUNCH		12.30pm – 1.00pm Prepare for success: five tips for stress-free dental care for adults with disabilities Caoimhin MacGiolla Phadraig	
2.00pm – 2.45pm		Pre-bleaching examination for best tooth-whitening outcome Van Haywood		1.00pm – 2.00pm LUNCH	
2.45pm – 3.30pm		Preventing dentistry ‘MI’ way! Avi Banerjee		2.00pm – 2.45pm The ideal appliance for the individual patient Kate Counihan	
				2.45pm – 3.30pm Functional considerations in orofacial reconstruction after cancer ablative surgery Conor Barry	
3.30pm – 4.00pm		COFFEE BREAK		3.30pm – 4.00pm COFFEE BREAK	
4.00pm – 4.45pm		‘MI’ caries management – take it, leave it or stick to it! Avi Banerjee		4.00pm – 4.45pm Implant-based rehabilitation in the management of maxillary and mid-face malignancy: a classification-based approach Chris Butterworth	
					

PROGRAMME

THE BURREN SUITE

9.30am – 1.00pm Enhancing your patient experience – a workshop for dental nurses/practice managers
Horton Consulting
Including:
■ marketing a dental practice;
■ social media;
■ managing stock control;
■ GDPR; and,
■ dealing with difficult patients.

1.00pm – 2.00pm **LUNCH**

2.00pm – 2.45pm Dental records
Thomas McCaffrey

2.45pm – 3.30pm Infection prevention and control – four things you must do
Jane Renehan

Dental nurses/practice managers are welcome to attend any lecture on the Friday and Saturday programmes.

Wrigley's Extra.

Another way to improve your patients' oral health

Significant changes in lifestyle mean that traditional eating habits have altered, and people are now eating on the go more than ever before. The more we snack, the more our teeth come under attack.

- Independent clinical research proves that chewing sugarfree gum for 20 minutes after eating or drinking helps neutralise the plaque acid attacks that can cause tooth decay¹ and contributes to removing food remains².
- Increased flow of saliva also promotes the remineralisation of tooth enamel,³ thus reducing one risk factor for developing tooth decay^{4,5}.

Chewing sugarfree gum after eating and drinking helps neutralise plaque acids, assisting in keeping teeth clean and healthy.^{1,2,4,5}

Help your patients improve their oral health through one extra simple and enjoyable step – recommend Wrigley's Extra®.

To learn more about the science behind the benefits of sugarfree gum visit www.wrigleyoralhealthcare.ie

DR JOE MOLONEY AWARD

Dr Harry Barry (centre), pictured with Drs Paddy Crotty and Clodagh McAllister, was the recipient of the Joe Moloney Award for 2018.

The Dr Joe Moloney Award is awarded to an outstanding Irish presenter/lecturer at our conference, and is chosen by the delegates. The winner of the Award, which is kindly sponsored by the Dental Health Foundation, will be chosen on the final day of the Conference, when all delegates will have the chance to nominate their presenter of choice.

DR TONY COSTELLO MEDAL

Mrs Jackie Costello (centre) is pictured with 2018 Costello Medal Award winners Rawan Kahatab and Jelena Djokic.

The Costello Medal is awarded to a student or students from one of the dental schools each year for a table demonstration on Friday of the Conference. The competition will be judged on a table demonstration or poster demonstration of not more than 10 minutes' duration on a subject applicable to general dental practice. The Irish Dental Association will provide a grant for each demonstration.

DR NICK ARMSTRONG

Former Principal Dental Surgeon, HSE and member of the IDA's Quality and Patient Safety Committee

Achieving compliance – frequently asked questions

This interactive workshop aims to examine the topic of achieving compliance.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the Best Practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

PROFESSOR AVIJIT BANERJEE

Chair in Cariology & Operative Dentistry, Hon. Consultant/Clinical Lead, Restorative Dentistry

Preventing dentistry 'MI' way!

In his first lecture, Avi will outline and discuss what the term 'MI' dentistry (minimum intervention oral healthcare and minimally invasive operative management) means to the profession and other stakeholders.

'MI' caries management – take it, leave it or stick to it!

In his second presentation, Avi will update the modern understanding of the caries process and management of the more extensive lesion, using selective carious tissue excavation approaches.

MR CONOR BARRY

Consultant Head & Neck Cancer Surgeon, National Maxillofacial Unit, St James's Hospital Dublin/Dublin Dental University Hospital

Functional considerations in orofacial reconstruction after cancer ablative surgery

Optimisation of orofacial reconstruction requires careful consideration of the functional requirements of the patient. In particular, speech, swallow and the need for dental rehabilitation must be considered when planning the reconstruction. A close working relationship with a restorative dentist with training in maxillofacial prosthodontics is essential. This lecture provides an overview of the decision pathways and algorithms involved.

MICHAEL BENTLEY

Horton Consultancy
Dental Practice Management
Consultant/Dental Nurse

Practice management for the dental nurse and practice manager

This workshop is designed for dental nurses/practice managers to support them in running/developing the practice. Delegates will:

- understand the branding and marketing that is essential for your practice's success;
- understand how social media can work for your practice;
- learn how to turn marketing enquiries into patients through front desk phone calls;
- GDPR; and,
- dealing with difficult patients.

DR CHRIS BUTTERWORTH

Consultant in Oral Rehabilitation, University Hospital Aintree and Liverpool Dental Hospital, Hon. Senior Lecturer in Maxillofacial Prosthodontics, University of Liverpool

Implant-based rehabilitation in the management of maxillary and mid-face malignancy: a classification-based approach.

Treatment paradigms for the dental and prosthetic rehabilitation of patients with head and neck cancer are changing. This lecture will discuss the clinical approaches based on the degree of maxillary/mid-face resection, together with novel approaches developed by the team in Liverpool to provide maxillary implant-supported fixed dental rehabilitation, often in a matter of weeks following maxillectomy for selected cases.

MR ASHLEY BYRNE

Clinical Dental Technician, Byrnes Dental Laboratory, UK

Advanced digital solutions in modern restorative dentistry

This presentation looks at how digital dentistry advancements are improving restorative dentistry treatment options. From case planning through to temporisation then on to definitive options, the lecture looks at the value of digital dentistry. Using intra-oral scans, CAD-CAM and 3D printing of both resins and metals, it's never been a more exciting time to be in restorative dentistry, and this lecture shows the latest and greatest of those developments.

DR PAT CLEARY
Practice Limited to Endodontics, Dublin

Root to tip – endodontic and restorative treatment revisited

Endodontic treatment is an area of dentistry that requires: a) an investigative mind, to determine an accurate diagnosis; b) a science-based mind to assist in a biological approach to treatment; c) an artist's appreciation of preparation; and, d) an engineer's approach to restoration. This hands-on course will cover all these areas. At the end of this course participants should be in a position to:

- a) make a definitive endodontic diagnosis;
- b) understand the cause of the problem and what is required for a successful outcome;
- c) embrace the art of endodontics; and,
- d) decide the requirements for the restoration of an endodontically treated tooth.

DR IAN CLINE
GDP and Lecturer, King's College London

Aesthetic and functional direct restorations

Ian believes in the preservation of tooth structure while also exceeding the expectations of the patient in terms of aesthetics and longevity. He will illustrate his minimalist approach with numerous clinical cases from his practice. In this presentation, Ian will take a broad view of the use of direct composite and show, among other things:

- tooth analysis to simplify shade selection;
- how to choose an appropriate composite;
- overview of the 'Dahl concept';
- how to rapidly finish and polish composite for excellent results; and,
- composite restoration of the root-filled posterior tooth.

DR KATE COUNIHAN
Specialist Orthodontist, Tralee, Co. Kerry

The ideal appliance for the individual patient

Over the last 20 years there has been a large increase in the general public's interest in orthodontics. Every orthodontic practice has experienced a significant increase in the proportion of adults seeking treatment. Patients are also more demanding in relation to quality of results and length of treatment. We have also seen an increase in the number and types of appliances we use. Our techniques have also changed dramatically. This lecture will discuss the appropriate timing, treatment techniques, and most suitable appliances for the individual patient. It will show how newer appliances and techniques are used. It will also show how some older and newer appliances can be combined to be most effective.

DR EAMON CROKE
GDP, Dublin, and member of the IDA's Quality and Patient Safety Committee

Achieving compliance – frequently asked questions

This interactive workshop aims to examine the topic of achieving compliance.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the Best Practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

DR CIARA DOHERTY
General Medical Practitioner, Dublin

Approaches to challenging consultations

This presentation will cover the consultation models used in general practice training. These help to establish a structure and effectiveness to the consultation, and can help to reduce difficult outcomes. A clear explanation of the various clinician/patient factors at play in the consultation will also be discussed, as well as the impact of work-related stress and how to manage this.

DR RACHEL DOODY
Practice Limited to Periodontics, Dublin

Perio update for daily practice

At the end of this lecture, delegates should be: familiar with the new classification of periodontal and peri-implant diseases; able to screen patients for periodontal diseases; able to group patients based on their classification and risk profile; familiar with current treatment modalities for patient groups; and, familiar with how to maintain different patient groups.

DR MAURICE FITZGERALD
Practice Limited to
Prosthodontics, Dublin

Getting started in digital dentistry

This half-day course will give a detailed overview of the current landscape and future of dental digital technologies. Emphasis will be placed on:

- practical integration into dental practice;
- the benefits and limitations of the technologies;
- economic pros and cons;
- hands-on time with intra-oral scanners;
- hands-on time with 3D printers; and,
- hands-on time with the associated software packages.

The course is designed to leave the participant more confident in making the switch to digital dentistry and more assured of making the correct investment in these exciting technologies.

DR DANIEL FLYNN
Specialist Endodontist, Private Practice,
London

Endodontic microsurgery: the ultimate tooth-saving treatment

Endodontic microsurgery fits in with the narrative of minimally invasive dentistry and broad thinking in our treatment planning. It has become increasingly clear that it is preferable to retain a natural tooth rather than elect for its removal and replacement, so long as the tooth is restorable and periodontally viable. With already excellent success rates for our conventional root canal treatment, having endodontic microsurgery as a back-up option gives the general dentist huge confidence in the ability to achieve endodontic success.

DR MARTIN FOSTER
Irish Lead,
Dental Protection

Avoiding complications of another type

As every clinician understands, the key to achieving the best outcome is careful assessment to ensure an understanding of a situation and identify where the potential problems may come from so these risks can be managed effectively. The same principles apply with respect to managing dentolegal risk. This presentation will highlight some of the more common issues faced by the dental team and provide practical tips on how to prevent recognised dentolegal complications causing problems.

DR BRIAN FRANKS
Programme Clinical Director and Senior
Lecturer, City of London Dental School

Introduction to non-surgical facial aesthetics: why, who, where, how, when, when not and the JOY!

This presentation will provide an introduction to non-surgical facial aesthetics (NSFA). It will help you to understand the role of these treatments in facial enhancement, in particular botulinum toxin and dermal fillers. This will include the specific role of botulinum toxin in the dental setting where it can be used to enhance treatment outcomes of bruxism and gummy smiles. It will provide an insight into setting up a successful and profitable NSFA practice, and promote understanding of the importance of appropriate training.

PROFESSOR VAN HAYWOOD
Professor of Restorative Sciences, Dental
College of Georgia at Augusta University

Bleaching single dark teeth, externally and internally

Restorative indications for anterior endodontically treated teeth have changed. Aesthetic evaluations, bonding insights, and special tray fabrication designs will be explained.

Pre-bleaching examination for best tooth-whitening outcome

The most critical factor in the tooth-whitening process is proper examination prior to initiating bleaching treatment. The diagnosis of the cause of discolouration then determines the treatment options.

DR CLAIRE HEALY
Consultant/Associate Professor in Oral
Medicine, Division of Oral and
Maxillofacial Surgery, Oral Medicine and
Oral Pathology, Dublin Dental University
Hospital, Trinity College Dublin

Oral mucosal disease and what to refer

This lecture will cover oral mucosal disease, including oral manifestations of systemic disease. At the end of the lecture, attendees should: know what oral mucosal diseases can be managed in the general dental practice setting; know what oral mucosal diseases should be referred for further investigation and management; understand the referral process; and, be familiar with the ongoing management of patients with oral mucosal disease who are discharged from an oral medicine unit.

MS LAURA HORTON,
Horton Consultancy
Dental Practice Management
Consultant/Dental Nurse

Practice management for the dental nurse and practice manager

This workshop is designed for dental nurses/practice managers to support them in running/developing the practice. Delegates will:

- understand the branding and marketing that is essential for your practice's success;
- understand how social media can work for your practice;
- learn how to turn marketing enquiries into patients through front desk phone calls;
- GDPR; and,
- dealing with difficult patients.

DR FRANK LOBBEZOO
Professor in Orofacial Pain and Related Disorders, Chair, Department of Oral Health Sciences, Vice-Dean, Academic Centre for Dentistry Amsterdam

Dental sleep medicine: an emerging dental discipline

While most sleep disorders should be diagnosed and treated by medical doctors, some belong to the dental domain. In this lecture, an overview of these dental sleep disorders will be given, with a focus on obstructive sleep apnoea.

Bruxism: friend or foe?

Bruxism is a phenomenon that is well known to dentists. Over the past years, however, new insights have emerged that represent a true paradigm shift.

DR CAOIMHIN MacGIOLLA PHADRAIG
Consultant, Special Care Dentistry,
Dublin Dental University Hospital,
Trinity College Dublin

Prepare for success: five tips for stress-free dental care for adults with disabilities

In this talk Kev shares his top tips to make managing patients with disabilities easier for the patient and the dental team. This talk will give attendees solid tips that will increase their confidence to treat seemingly complex patients. Specific topics covered include tricks for better assessment, better decision making, and how to make oral hygiene advice actually fun.

PROFESSOR PHILP MARSH

The oral microbiome in health and disease – an ecological perspective

THOMAS McCAFFREY
Dento Legal Advisor, Dental Protection

Dental records

This presentation will provide an overview and update of record keeping and describe the importance of good records within risk management for the whole dental team.

DR NIAMH O'SULLIVAN
Professor Emerita of Visual Culture
(National College of Art and Design,
Ireland) and founding Curator of Ireland's
Great Hunger Museum, Quinnipiac
University, Connecticut

Representing the unrepresentable

Over a million died during the Great Hunger. Before and during, over 2.5 million emigrated. The pall of death and emigration, poverty and destitution, erosions of language and culture, and survivors' guilt, meant that the burden of representation passed from generation to generation. The impossibility of giving voice to those who experienced the Famine, the paucity of material traces, and the scarcity of contemporary images, create challenges and opportunities that, arguably, artists are uniquely equipped to meet.

DR PAUL QUINLAN
Practice Limited to Periodontics, Dublin

How to predictably restore and replace teeth

As dentists we are often faced with a dilemma as to what to do when a patient presents with single or multiple severely broken down teeth. Should these teeth be retained or replaced? Dental implants seem to provide an ideal alternative; however, they are not without their problems. The purpose of this presentation is to help the dentist to decide which approach to take and provide periodontal and prosthodontic strategies to increase the likelihood of long-term success.

DR JANE RENEHAN
Quality & Patient Safety Committee, IDA

**Infection prevention and control
– four things you must do**

During this lecture, Jane will focus on the four infection prevention and control risk factors in dentistry, as identified by HIQA. She will give practical 'how to' guidance for dental nurses, practice managers and dental team members to assist them in supporting infection control compliance in the dental surgery.

Lecture objectives:

- awareness of HIQA's four dental risk management factors;
- identifying essential dos and don'ts to meet infection control standards; and,
- recognising the core compliance elements of a dental practice infection control strategy.

DR SEAMUS ROGERS
Oral Surgeon, Dublin

Take the tooth, not the bone: avoiding complications in oral surgery

A non-surgical extraction is often referred to as a 'simple' extraction but in many cases the non-surgical approach can lead to more problems postoperatively. Seamus will discuss the pre-operative assessment of his patients and the reasons why a clinician would 'skip' the non-surgical approach to an extraction in favour of the flapless sectioning of the tooth or the conventional surgical removal of the tooth. Seamus will demonstrate how to predictably section and remove a multirrooted tooth, and why this is so beneficial to both clinician and patient.

DR SEAMUS SHARKEY
Practice Limited to Prosthodontics, Cork

Preparation design – today's relevance!

This presentation will cover the classic and current trends in preparation design for fixed prosthodontics. From classic textbook preparations to more recent innovations, we will look at what factors are still as relevant today as they were 50 years ago. Also, what have modern materials allowed us to refine/change in the everyday crown preparation protocols and designs? These and other related questions will be answered with the emphasis on clinically relevant information for the practitioner. Learning objectives will include: understanding the principles of preparation design and their use in everyday practice; and, knowing how these designs affect the biological and technological limits of fixed prosthodontics.

DR ALASTAIR WOODS
GDP, Dublin

Getting started in digital dentistry

This half-day course will give a detailed overview of the current landscape and future of dental digital technologies. Emphasis will be placed on:

- practical integration into dental practice;
- the benefits and limitations of the technologies;
- economic pros and cons;
- hands-on time with intra-oral scanners;
- hands-on time with 3D printers; and,
- hands-on time with the associated software packages.

The course is designed to leave the participant more confident in making the switch to digital dentistry and more assured of making the correct investment in these exciting technologies.

DR SHANE WHITE
Professor of Endodontics in the
Constitutive & Regenerative Sciences,
University of California, Los Angeles

Psychosocial value of root canal treatment

We must consider the whole patient. This lecture will help you to: listen to and counter patient perceptions of fear, pain and anxiety; discuss the financial benefits of retaining a tooth through root canal treatment; and, advocate for saving teeth.

Tooth enamel: of mice and men

This lecture will look at how enamel is put together, how it comes apart, the importance of preservation, and how to best use it in restorative dentistry. Topics will include the linkage of genes to masticatory function, the miracle of biofabrication, nano to macro structure, the remarkable dentinoenamel junction, mouse models, and man's grief and pain.

SOCIAL PROGRAMME

PRESIDENT'S GOLF COMPETITION Galway Bay Golf Resort

The President's Golf competition will take place at Galway Bay Golf Resort on Thursday, April 4, from 1.00pm. For anyone booked to do a pre-Conference course on Thursday, we have reserved some tee times on Wednesday, April 3, in the afternoon.

Playing in three balls. As well as Conference delegates, accompanying persons and all trade exhibitors are also welcome to play. Only delegates registered for the Conference can be eligible for the President's Prize.

Tee Time: 1.00pm Green fees: €50

ANNUAL DINNER Inis Mór

The Annual Dinner will take place on Friday April 5. A drinks reception will commence at 7.00pm followed by dinner and entertainment. Dress code is black tie. Tickets are €85 and available from IDA House. All dental team members, trade members and friends are welcome to attend. Dancing to Frankly Sinatra.

TRADE SHOW OPENING PARTY

The 'Navigating the Future' trade show party will be officially opened by newly elected President Prof. Leo Stassen at approximately 8.00pm on Thursday directly after the AGM in the trade show area.

All delegates and trade sponsors are invited to attend. Fun, music and drinks will be provided for all.

Come along and enjoy the party!

PAST PRESIDENTS' LUNCH

The Past Presidents' lunch will take place in the Lough Atalia Suite on the fifth floor of The Galmont Hotel on Saturday at 1.00pm.

HyFlex™ EDM

THE NEW NITI FILE GENERATION

- Safer use
- Preparation following the anatomy
- Regeneration for reuse
- Up to **700 %** higher fracture resistance
- Specially hardened surface
- Exceptional flexibility
- Controlled memory

"COLTENE HyFlex™ EDM files are efficient in preparing canals. They have a conservative taper which reduces unnecessary removal of coronal dentine. In addition, they have a very high fracture resistance compared to most other rotary files. This gives me added confidence when preparing canals with severe curvatures. Together with the extraordinary flexibility of the files, COLTENE HyFlex™ EDM files are my choice of rotary endodontic files when preparing teeth with challenging root canal anatomy. Straight canals can be instrumented with the HyFlex™ 25 OneFile 25mm only, which is also cost efficient."
