ACCOMMODATION

All reservations must be made directly with the Midlands Park Hotel.

Overnight rate is €124 per single room per night and €154 per twin room. Bookings can be made by calling the hotel directly on 057-867 1919.

CANCELLATION POLICY

All cancellations must be received in writing either by email or by post to IDA House, Unit 2 Leopardstown Office Park, Sandyford, Dublin 18. Cancellations received 29 days or more prior to the course/event will be entitled to a 100% refund. Cancellations received between 15 days and 28 days (inclusive) prior to the course/event will receive a 75% refund. For cancellations received between one day and 14 days (inclusive) prior to the course/event, no refund will be given. Failure to attend the course/event on the day will constitute late cancellation and no refund will be given. Substitutions are welcome at any time. Due to unforeseen circumstances, the programme may change and the IDA reserves the right to cancel the event or alter the venue and/or speakers.

Irish Dental Association is an ADA CER.P Recognised Provider. ADA CER.P is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CER.P does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Irish Dental Association designates this activity for 11.5 continuing education credits.

PROGRAMME

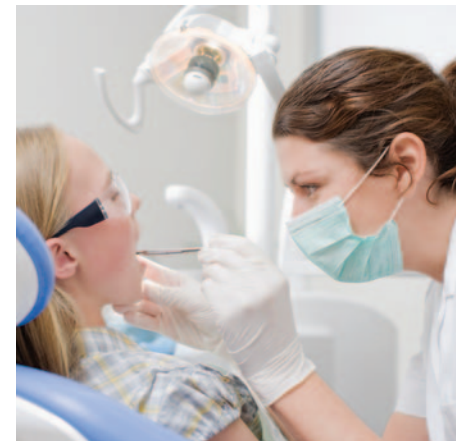

THURSDAY		
9.30am	Registration	
10.10am – 10.30am	NCEC Guideline 30 – infection prevention and control	Prof. Martin Cormican
10.30am – 11.30am	Managing malocclusion in the mixed dentition: reassuringly, less is more	Prof. Padraig Fleming
11.30am – 12.15pm	Radiation safety in dental radiography	Mandy Lewis
12.15pm – 1.00pm	Human factors in dentistry	Dr Noel Kavanagh
1.00pm – 2.00pm	LUNCH	
2.00pm – 3.00pm	A child-centred approach to delivering dental care	Dr Aifric Ní Chaollaí
3.00pm – 4.00pm	TRADE SHOW & TEA/COFFEE	
4.00pm – 5.00pm	Obesity – a pandemic in slow motion.	Prof. Donal O'Shea
5.30pm	Annual General Meeting	

FRIDAY		
9.00am – 9.45am	Minimum-intervention oral care (MIOC) – the contemporary approach to preventing and treating dental caries in primary care	Prof. Avi Banerjee
9.45am – 10.45am	XXX	Prof. Avi Banerjee
10.45am – 11.15am	TEA/COFFEE	
11.15am – 12.15pm	Modern medicine for a modern patient	Dr Danni McGowen
12.15pm – 1.00pm	Consent and the Assisted Capacity Act – an update	Dr Siobhan Stapleton
1.00pm – 2.00pm	LUNCH	
2.00pm – 3.00pm	Classification system for periodontics explained	Emily Clarke
2.30pm – 3.15pm	Medical emergencies and sedation – new guidelines	Prof. Leo Stassen

HSE DENTAL SURGEONS

SEMINAR 2023
MIDLANDS PARK HOTEL
PORTLAOISE
October 12+13

CPD VERIFIABLE

WELCOME

As President elect of HSE Dental Surgeons Group, it is with great pleasure that I extend a warm welcome to you to this year’s seminar. The event returns to the ever-popular Midlands Park Hotel, Portlaoise, on October 12 and 13, 2023.

This year we have an interesting and varied programme, with renowned speakers on various dental and non-dental topics of relevance to those working in the public dental service.

I am delighted to welcome Prof. Martin Cormican as our opening speaker on Thursday. Prof. Cormican was made an Honorary Member of the Irish Dental Association earlier this year, and it is an honour to have him address our event.

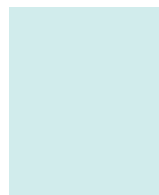

Once again, we welcome the involvement of our dental trade colleagues on Thursday at our trade show. Their presence and sponsorship of the seminar allows up to put together such a varied programme of speakers and we thank them for their ongoing support.

Our AGM will take place Thursday at 5.00pm and I encourage all IDA members to attend. The AGM gives you the opportunity to have your say on how your membership body works on your behalf.

As ever, the social side of the Annual Seminar is paramount to a successful few days! It is an ideal opportunity to catch up with old friends, meet up with new ones and link up with dental colleagues.

This year’s HSE Seminar is one not to be missed for all those employed in the HSE dental service.

We look forward to welcoming you to the Midlands Park in October.

DR SIOBHAN DOHERTY

President Elect

SPEAKERS

Dr Danielle McGeown

Modern medicine for a modern patient

This lecture will provide an up-to-date review of some of the medications taken by dental patients and their relevance to dental treatment. The focus will be on new or emerging medications that it may be important to be aware of. The lecture will discuss some of the background conditions associated with these medications, so that the dental team can recognise these in the medical history and know their relevance to proposed care.

Dr Noel Kavanagh

Human factors in dentistry

Learning objectives:

- understand human error;
- introduce human factors science; and,
- explore safer and more reliable practices.

Dr Siobhan Stapleton

Consent and the Assisted Capacity Act – an update

Learning objectives:

- recognise current best practice in relation to capacity and consent for patients with disabilities in Ireland;
- review the required changes expected with the implementation of the Assisted Decision Making (Capacity) Act; and,
- methods of improving communication in special care dentistry in relation to consent.

Prof. Avi Banerjee

Minimum-intervention oral care (MIOC) – the contemporary approach to preventing and treating dental caries in primary care

Learning objectives:

- describe the MIOC framework and its four interlinked clinical domains of care; and,
- translate the clinical and scientific evidence relating to the prevention of caries, and management of the deep carious lesion, to its practical chair-side implementation.

Prof. Donal O'Shea

Obesity – a pandemic in slow motion.

This talk will focus on how our understanding of obesity has moved on and how much better we understand how the body regulates weight. We now know that for 90% of people weight gain is 90% irreversible. Adipose tissue thermogenesis regulates this process and is influenced by medication – contributing to medication-induced weight gain. Understanding this interaction between medication and weight helps with empathy in raising the issue of weight and allows a positive start to address weight reduction.

Dr Martin Cormican

NCEC Guideline 30 – infection prevention and control

The Department of Health has published a National Clinical Effectiveness Committee (NCEC) guideline on infection prevention and control. This is a comprehensive document that is intended to support all healthcare service providers in Ireland.

Learning objectives. Familiarity with key points of NCEC Guideline 30 and with the structure and use of the document.

Prof. Padhraig Fleming

Managing malocclusion in the mixed dentition: reassuringly, less is more

Learning objectives:

- to understand the constraints of dentofacial orthopaedics and to be capable of timing intervention accordingly;
- to recognise abnormal dental development; and,
- to be capable of appropriate referral and of instituting selective interceptive measures on an individual basis.

Mandy Lewis

Radiation safety in dental radiography

XXX

Dr Aifric Ní Chaollaí

A child-centred approach to delivering dental care.

Learning objectives:

- help improve patient and parent autonomy in preventing dental caries;
- Tips on non-pharmacological behaviour guidance to improve a child's experience of the dental visit and help achieve the dentist's aim of providing appropriate care; and,
- Real and effective methods of avoiding the need for general anaesthesia.

Emily Clarke

Classification system for periodontics explained
