

IDA Annual Conference

The Galmont Hotel | Galway | May 14-16, 2020

ON COURSE FOR CHANGE

PRESIDENT'S WELCOME

Fáilte go Gaillimh 2020!

Welcome to Galway 2020!

The Annual Conference 2020 returns to the Wild Atlantic Way and the beautiful city of Galway on Ireland's west coast. This is a fantastic opportunity to bring along your dental team for a fun, sociable and educational team-building experience.

I am very grateful to this year's Conference Committee, Drs Aoife Crotty, Maurice Fitzgerald, Helen Walsh, Alastair Woods and Danny Collins, and Ms Elaine Hughes, who have put together a world-class scientific programme for this year's event. We are extremely fortunate to have world-recognised experts such as Chris Orr, Ray Bertolotti, and Maurice Salama, as well as many more. The very best of local Irish talent will also present over the three days, including Drs Paddy Crotty, Tom Canning, and Sheila Galvin.

We will of course have two programmes running simultaneously on Friday and Saturday, so delegates can choose which to attend. A full dental nurses' programme will take place on Saturday.

As is the case every year, the dental trade show will showcase new and advanced products, equipment and technology from the dental industry. All members of the dental team will have the opportunity to discuss new products and various advancements in services with our dental trade colleagues.

The Annual GP Meeting will take place at 12.00pm on Friday, May 15 – all IDA GDPs are welcome to attend. This year the GP Group will also have its AGM during this time slot.

Our golfers can look forward to our annual President's Prize at Galway Golf Club on Thursday, May 14, and we also have some tee times available on Wednesday for those who are doing a pre-conference course on Thursday.

Don't forget our Annual Dinner on Friday night at the Galmont Hotel. All are welcome. Remember to include "On Course for Change" in your calendar of events of 2020.

I look forward to seeing as many colleagues and team members as possible in May!

A handwritten signature in black ink that reads "Anne O'Neill".

Dr Anne O'Neill
President Elect

PRE-CONFERENCE PROGRAMME 3

CONFERENCE PROGRAMME 4

NURSES' PROGRAMME 5

2020 will see a dedicated dental nurses' programme. Dental hygienists are welcome to attend any of the sessions on both Friday and Saturday.

PRE-CONFERENCE PROGRAMME

THURSDAY MAY 14

Posterior composites in 2020: layering, bulk fill (9.30am – 1.00pm or 2.00pm – 5.00pm)

Drs Chris Orr and Paddy Crotty

HALF-DAY WORKSHOP

Posterior composite has evolved into a reliable workhorse in our clinical armamentarium. In spite of wide clinical research, many questions remain. Is incremental layering still the “gold” standard? If so, which technique? Are bulk fill materials an alternative? How best to manage contact points? When is it better to make an inlay or onlay? How to achieve a good restoration in a realistic amount of clinical time? This hands-on workshop will address these and many other questions, as well as giving delegates an opportunity to try the different materials themselves. Participants will learn:

1. A simple method to select direct vs indirect restorations for different clinical scenarios.
2. Which layering techniques work best with traditional composite resins.
3. Which clinical scenarios may benefit from a bulk fill technique.
4. Management of contact points with traditional and sectional matrices.
5. Finishing and polishing restorations.
6. Management of post-op sensitivity.

Tooth replacement strategies in the aesthetic zone (9.30am – 5.30pm)

Dr Maurice Salama

FULL-DAY/LECTURE

With the advent of new technologies, techniques and materials, the ability to replace missing teeth with the form, function and beauty of the natural dentition is now possible. This presentation will focus on the interdisciplinary relationship between the restorative dentist, surgeon and orthodontist to reconstruct the soft tissue foundation for all of these restorative options in anterior tooth replacement. The diagnosis of deficiencies, as well as the varied treatment options, will be discussed in detail. Course objectives include being able to answer the following questions:

1. What are the risk factors in anterior implant therapy?
2. What are the four most important diagnostic components leading to a successful treatment design for an aesthetic restoration?
3. How and when do we successfully incorporate minimally invasive protocols?
4. How do new CBCT, digital 3D planning software and CAD/CAM technology optimise minimally invasive anterior implant therapy?

Practice management secrets (9.30am – 5.30pm)

Dr James Goolnik

FULL-DAY/LECTURE

This lively presentation will cover how to run a successful dental practice while having a life. There will be ways to engage both your team and your patients, while enriching your community. You will come away with an action plan of how you can invigorate yourself and your business.

Learning objectives – upon completion of this lecture attendees should be able to:

- set business objectives;
- control business costs and learn how to price your services;
- attract the right patients and then keep them; and,
- empower your team.

Achieving compliance - frequently asked questions

Drs Nick Armstrong and Eamon Croke

Chair: Jane Renehan (11.00am – 12.30pm or 3.00pm – 4.30pm)

90 MINUTE/LECTURE

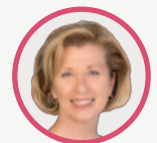

This interactive workshop aims to examine the topic of achieving compliance by answering the most frequently asked questions. Based on their wide range of compliance experience, the presenters will demonstrate that simple solutions are normally the best solutions! Participants will gain insight into:

- 1) HIQA and EPA Radiation Protection standards;
- 2) Health and Safety Authority's Guidance on Hazards in Dentistry;
- 3) Dental Council Codes of Practice; and,
- 4) other significant legislation and guidelines.

In advance of the workshop additional topical subjects may be included. The workshop is recommended for dentists, dental hygienists, practice managers and senior dental nurses.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the best practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

Adhesion dentistry incorporates biomimetics (9.30am – 12.30pm and 2.30pm – 5.30pm)

Dr Ray Bertolotti

FULL-DAY/LECTURE

There are many compelling clinical benefits for utilising adhesion rather than tooth-destroying mechanical retention. After a presentation of current adhesive technology, clinical protocols for utilisation of bonded composite, metal and porcelain will be presented, including porcelain repairs that work long term. Long-term clinical recalls are shown, and extensive, scientifically sound references are given.

Learning objectives

- why flat, adhesion-retained onlays on a biobase lead to easier and far better dentistry;
- when to stop caries excavation to avoid unnecessary pulp exposure;
- why some popular self-etching cements prove to be very poor choices; and,
- how to make intelligent compromises: what is acceptable?

6.00pm – IDU Annual General Meeting and IDA Annual General Meeting, followed by trade show party.

PROGRAMME 1	INIS MÓR 2	PROGRAMME 2	INIS MÓR 3
9.00am – 10.00am	All on X: Full arch implant dentistry Maurice Salama	9.00am – 10.00am	Crown and bridge impressions: tips for consistent, predictable outcomes. Donal Blackwell
10.00am – 10.45am	The worn dentition: solving the diagnostic, aesthetic, functional and restorative challenges Chris Orr	10.00am – 10.45am	CBCT in endodontics Shanon Patel
10.45am – 11.15am	COFFEE BREAK	10.45am – 11.15am	COFFEE BREAK
11.15am – 12.00pm	The worn dentition: solving the diagnostic, aesthetic, functional and restorative challenges (<i>continued</i>) Chris Orr	11.15am – 12.00pm	Prevent and recover from a nightmare data loss Maurice Fitzgerald
12.00pm – 1.00pm	GP MEETING	12.00pm – 1.00pm	Digital photography: F:OCUS ONE Minesh Patel
1.00pm – 2.00pm	LUNCH	1.00pm – 2.00pm	LUNCH
2.00pm – 2.45pm	Social media 101: how to grow your practice with social media Slaine McGrath	2.00pm – 2.45pm	Shade taking Tautvilas Kaktys
2.45pm – 3.30pm	Be seen, be found and be talked about James Goolnik	2.45pm – 3.30pm	Oral surgery primer: standard techniques and manoeuvres that can be used in practice Justin Moloney
3.30pm – 4.00pm	COFFEE BREAK	3.30pm – 4.00pm	COFFEE BREAK
<p>Both programmes will merge for the last two presentations – two fascinating speakers/topics not to be missed by any dental team member.</p>			
4.00pm – 4.45pm	Great expectations Raj Rattan		
4.45pm – 5.45pm	Understanding the psychology of social media: turning the patient into the publicist Ciaran McMahon		

Friday, May 15

ANNUAL PRESIDENT'S DINNER 2020

7.00pm Drinks reception
8.15pm Dinner followed by entertainment

TICKETS €85

All dental team members, trade members and friends welcome

CONFERENCE PROGRAMME

SATURDAY MAY 16

PROGRAMME 1	INIS MÓR 2	PROGRAMME 2	INIS MÓR 3
9.30am – 11.00am	Non-invasive anterior aesthetic corrections Ray Bertolotti	10.00am – 11.00am	Autism: removing the barriers to successful dental care Gillian Smith and Jennifer Collins
11.00am – 11.30am	COFFEE BREAK	11.00am – 11.30am	COFFEE BREAK
11.30am – 12.15pm	Making endo easier, safer and more predictable Ciaran O’Driscoll	11.30am – 12.15pm	Trauma management Anne O’Connell
12.15pm – 1.00pm	“Restorodontics”: assisting the restoring dentist in delivering better patient outcomes Tom Houlihan	12.15pm – 1.00pm	Paediatric dentistry and fluorides Jennifer McCafferty
1.00pm – 2.00pm	LUNCH	1.00pm – 2.00pm	LUNCH
2.00pm – 2.45pm	Osteoporosis and osteoclast inhibitors Lars Rasmusson	2.00pm – 2.45pm	Recent advances in digital dentistry and their application to everyday clinical practice Tom Canning
2.45pm – 3.30pm	Antimicrobial resistance Martin Cormican	2.45pm – 3.30pm	Lumps and bumps Sheila Galvin
3.30pm – 4.00pm	COFFEE BREAK	3.30pm – 4.00pm	COFFEE BREAK
Both programmes will merge for the last presentation			
4.00pm – 4.45pm	Aesthetics and dentistry in 2020: the good, the bad and the ugly Martin Cormican		

NURSES’ PROGRAMME

SATURDAY MAY 16

PROGRAMME	THE BURREN SUITE
10.00am – 11.00am	Autism: removing the barriers to successful dental care (Inis Mór 3) Gillian Smith and Jennifer Collins
11.00am – 11.30am	TEA/COFFEE
11.30am – 12.15pm	The compliant practice – my top 10 tips Jane Renehan
12.15pm – 1.00pm	Team involvement for better record keeping Noel Kavanagh
1.00pm – 2.00pm	LUNCH
2.00pm – 4.00pm	Management of medical emergencies within the dental practice – the team approach Safe Hands

Dental nurses/practice managers are welcome to attend any lecture on the Friday and Saturday programmes.

DR NICK ARMSTRONG
Former Principal Dental Surgeon, HSE,
and member of the IDA Quality and Patient
Safety Committee

Achieving compliance – frequently asked questions

This interactive workshop aims to examine the topic of achieving compliance.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the best practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

DR RAYMOND BERTOLOTTI
Clinical Professor Emeritus,
University of California

Non-invasive anterior aesthetic corrections

Presentation will include: restoration and correction of anterior tooth defects need not be invasive. Learning adhesion and when to trust that it is required. Re-attachment of fractured off teeth requires only a bonding agent. Missing incisors do not require implants; they can be reliably replaced with all-ceramic adhesion bridges, which are more successful than implants. White spot removal requires only phosphoric acid and abrasive. This is “fun” dentistry.

DR DONAL BLACKWELL
Practice limited to prosthodontics, Waterford

Crown and bridge impressions: tips for consistent, predictable outcomes

This presentation will focus on the technique and materials required to deliver good, predictable impression outcomes, with special emphasis on the ‘two-cord technique’. The presentation will make the case for retaining and improving impression-taking skills.

Learning objectives:

- become familiar with the steps required to prepare for the impression stage;
- identify the materials and instruments needed to execute this procedure well and with confidence; and,
- predictably manage the stages and materials needed to overcome difficulties/complications with the impression-taking process.

DR THOMAS CANNING
Practice limited to prosthodontics and
implant dentistry

Recent advances in digital dentistry and their application to everyday clinical practice

This presentation aims to provide an overview of some of the digital tools available to today’s practitioners. Dentistry has advanced at a rapid rate in the last 10 years and numerous new tools are available for diagnosis, planning and treatment. Thomas’s practice has embraced many of these new technologies and he employs numerous digital applications in the day-to-day treatment of his patients. The objectives of this presentation are to introduce some of the newer technologies available to dentists, highlight some of their advantages and pitfalls, and demonstrate the workflow of a digital practice. Following this presentation attendees should be able to implement some of the applications in their own clinical environment.

DR JENNIFER COLLINS
GDP, Dublin

Autism: removing the barriers to successful dental care

Autism is a prevalent condition that affects how a person communicates and relates to people around them. Many issues can arise in the surgery when treating a patient with autism, given the huge sensory overload that dental treatment presents. This lecture presents an insight into the challenges faced by patients with autism when attending a dental surgery. We will offer some helpful techniques and tools that the dental team can use to help patients with autism to access care. On completion of this lecture, the attendee will have a greater understanding of autism, along with a practical guide on how to help the dental team, and these patients, to navigate their experience of dental care.

DR EAMON CROKE
GDP, Dublin, and member of the IDA Quality
and Patient Safety Committee

Achieving compliance – frequently asked questions

This interactive workshop aims to examine the topic of achieving compliance.

Learning objectives:

- consider essential elements of compliance requirements and the role of statutory bodies;
- review the extensive range of resources and support tools available on the best practice section of the IDA website;
- examine the key areas of compliance under the headings dentist, dental team and clinical setting; and,
- provide participants with easily done improvement tips to make compliance achievable.

DR PADDY CROTTY
Restorative dentist, Dublin

Posterior composites in 2020: layering, bulk fill

Posterior composite has evolved into a reliable workhorse in our clinical armamentarium. In spite of wide clinical research, many questions remain. Is incremental layering still the “gold” standard? If so, which technique? Are bulk fill materials an alternative? How best to manage contact points? When is it better to make an inlay or onlay? How to achieve a good restoration in a realistic amount of clinical time? This hands-on workshop will address these and many other questions, as well as giving delegates an opportunity to try the different materials themselves.

DR MAURICE FITZGERALD
Practice limited to prosthodontics, Dublin

Prevent and recover from a nightmare data loss

This talk aims to give real-world rules and protocols to use in general dental practice to ensure the integrity and security of your crucial practice data, patient records, clinical X-rays and pictures. Topics will include:

- recommendations when buying computers;
- should you use cloud storage?;
- how can you recover quickly from data loss?;
- what back-ups should you keep and where?; and,
- tips for minimising the chance of data loss.

DR SHEILA GALVIN
Consultant/Assistant Professor in Oral Medicine, Dublin Dental University Hospital, Trinity College Dublin

Lumps and bumps

This lecture will cover the common benign lumps and bumps the dentist may encounter on a regular basis, along with some of the more uncommon and worrying causes of swellings of the oral mucosa. At the end of the lecture attendees should: recognise some of the common benign swellings of the oral mucosa; recognise what swellings need to be referred urgently for further investigation and management; and, understand the referral process.

DR JAMES GOOLNIK
GDP

Be seen, be found and be talked about

Learn the marketing strategies you need to get in front of your ideal customers. This is a fun team empowerment session.

Learning objectives:

- learn what is important in your brand;
- identify where your marketing messages could be improved; and,
- learn the secrets to gaining more reviews.

DR TOM HOULIHAN
Orthodontist, private practice, Dublin

“Restorodentics”: assisting the restoring dentist in delivering better patient outcomes

This talk will discuss various scenarios that the dentist encounters every day and how orthodontics can help them achieve optimum outcomes. Examples will be discussed from simple cases to varying complexities. Learning objectives will include: range of treatment options available in orthodontics to help with routine dental issues in treatment planning and outcomes; cracked teeth; third molars; traumatic bite issues; and, more complex interface with restorative treatment plan.

DR NOEL KAVANAGH
Education and Engagement Lead (Ireland), Dental Protection

Team involvement for better record keeping

An overview of record keeping and why it’s so important, but focusing on how the dental nurse can be more involved in the process. We will explore the practicalities involved, the benefits for all concerned and the potential challenges.

This will all be discussed in the context of practical implementation in a busy dental surgery.

DR JENNIFER McCAFFERTY
Paediatric Dentist

Paediatric dentistry and fluorides

This presentation will cover the evidence-based use of the various types of fluoride and the practical and safe use of fluoride in paediatric dentistry.

Learning objectives

Upon completion of this lecture the attendee should be able to: discuss the various types of fluorides available both for use in the surgery and to recommend to patients what to buy for day to day use; be aware of the beneficial effects of fluoride in managing tooth decay in children; be aware of safety issues in relation to doses of fluoride used in children; and, understand the evidence available in relation to the effectiveness of public fluoridation in reducing tooth decay in Ireland.

DR SLAINE McGRATH
GDP London, Cosmetic Dentistry

Social media 101: How to grow your practice with social media

Learning objectives:

- how to set up and grow your business social media profile;
- how to target potential patients; and,
- how to increase your practice revenue with social media.

DR CIARÁN McMAHON
Author, *The Psychology of Social Media*

Understanding the psychology of social media: turning the patient into the publicist

A journey of self-discovery into the strange and wonderful world of social media psychology. By interpreting how human psychology is becoming digitalised via social media, this lecture will encourage the audience to think about how their patients' subjective experiences are changing: how social media is rendering our psychology machine readable.

Learning objectives

Upon completion of this lecture attendees should be able to:

- define social media and list its major features;
- explain the six major concepts of social media psychology; and,
- appreciate how the digitalisation of psychology is transforming patients' lives.

DR JUSTIN MOLONEY
Oral surgeon,
Dublin and Waterford

Oral surgery primer: standard techniques and manoeuvres that can be used in practice

Standard techniques and manoeuvres that can be used in practice.

This talk will be a video-based presentation that will illustrate different aspects of oral surgery in practice. Flaps, bone removal, sectioning of roots and closure will be discussed in easy and not-so-easy cases. Delegates will have a refresher in basic oral surgery, which they can take back with them to their own practices to enhance patient care.

DR ANNE O'CONNELL
Associate Professor/Consultant,
Paediatric Dentistry, Dublin

Trauma management

This is a case-based presentation outlining the importance of accurate diagnosis, appropriate treatment and follow-up in trauma cases. The rationale and evidence for the management of complications and the timing of clinical decisions will be highlighted. The endodontic cases discussed were further complicated by a past history of trauma.

DR CIARAN O'DRISCOLL
Practice limited to endodontics,
Dublin

Making endo easier, safer and more predictable

A look at current concepts of endodontic treatment, how the GDP can integrate knowledge and technology into practice to make endo easier, safer and more predictable.

Learning objectives:

- pre-, intra- and post-operative prognostic factors in root-canal treatment;
- be aware of the common complications and procedural mishaps that can occur during root canal treatment, and to have strategies to avoid them; and,
- be able to discuss the armamentarium and instrumentation available to facilitate more predictable endodontics.

DR CHRISTOPHER ORR

The worn dentition: solving the diagnostic, aesthetic, functional and restorative challenges

Tooth wear has been described as “a condition in waiting”. As we reduce our patients’ levels of caries and periodontal disease, it is the biggest growing problem in 21st century dentistry.

Learning objectives:

- a structured approach to diagnosis and treatment planning;
- a straightforward method to diagnose the main aetiological factor in severe tooth wear;
- simple screening examinations that will allow early detection of wear;
- occlusal management;
- restorative space management; and,
- how to phase treatment in order to make ‘big’ cases affordable.

DR MINESH PATEL
BDS Hons MSc(Aes) MFGDP, PGC(Perio)

Digital photography: F:OCUS ONE

A one-hour immersive and interactive presentation designed to introduce you to the art of dental photography, involving live, on-stage shooting tips!

Learning objectives:

- overview of basic camera hardware, settings and lighting;
- photographic views and tips for a full clinical series;
- useful applications of clinical photography in dental practice; and,
- unique on-stage live tethered shooting performance.

DR SHANON PATEL
Specialist endodontist

CBCT in endodontics

Conventional radiographs are essential in endodontics; however, they have several limitations, which may be overcome with CBCT. The aim of this presentation is to give an overview of the impact CBCT has had in endodontic diagnosis, management and assessment of outcome. Clinical research will be presented, which has a direct impact on everyday endodontic treatment. New prognostic factors will also be revealed.

PROF. LARS RASMUSSON
Senior Dental Officer, University of Gothenburg, Sweden

Osteoporosis and osteoclast inhibitors

This lecture will address the underlying pathogenic mechanisms behind osteoporosis, osteoporotic fractures, treatment options, and how to identify and treat side effects of medication-induced osteonecrosis of the jaw. Dental extractions have been particularly pointed out as a risk factor for inducing jawbone necrosis. There are, however, certain treatment protocols that minimise the risks.

Learning objectives

Attendees should (hopefully) learn:

- about osteoporosis and modern treatment;
- about risk factors for MRONJ;
- how to minimise the risk for development of MRONJ; and,
- how to treat confirmed MRONJ.

DR RAJ RATTAN
Director,
Dental Protection

Great expectations

In his presentation, Raj will explore the science and psychology of managing patient expectations in the context of general dental practice. He will explore a number of themes including verbal and non-verbal communication techniques, the impact of the dentist-patient relationship, and the patient and dentist perceptions of the quality of care delivered. The presentation will also look at aspects of quality both from a technical and service perspective with a focus on the patient experience.

Learning objectives

To outline effective communication techniques, to explore the dento-legal consequences of failing to meet expectations and to present effective risk management strategies.

DR JANE RENEHAN
Compliance Consultant,
Dental Compliance Ltd.

The compliant practice – My top 10 tips

Jane will present a whistle-stop tour of dental compliance elements in the dental practice. Learn her top tips for ensuring adherence with national compliance standards. This presentation is a must for those who are charged with the daily task of implementing and co-ordinating compliance.

Learning objectives:

- key compliance statutory and regulatory obligations will be identified and discussed;
- practical examples will be explored on the “how-to” of integrating and validating compliance processes into daily clinical practice; and,
- an awareness of achievable pathways towards co-ordinating dental compliance.

DR MAURICE SALAMA
Orthodontist, periodontist and member
of dentalxp.com

SAFE HANDS
Patrick O'Hare and Kelly Doherty
Safe Hands

DR GILLIAN SMITH
GDP,
Bray

All on X: team collaboration when restoring the full arch

This lecture will highlight some of the clinical challenges, materials and the protocols needed to meet team expectations and deliver a successful outcome.

Learning objectives:

- common treatment modalities for fixed full-arch implant candidates;
- factors involved in treatment planning for the immediate extraction or edentulous arch;
- review role of CAD/CAM in full-arch prosthetics;
- understand the indications and process for immediate load full-arch prosthodontics; and,
- understand the role of CBCT and 3D software for diagnosis and planning.

Management of medical emergencies within the dental practice – the team approach

This two-hour workshop will cover the essentials in managing medical emergencies in the dental practice, including what should be in a drugs kit.

Autism: removing the barriers to successful dental care

Autism is a prevalent condition that affects how a person communicates and relates to people around them. Many issues can arise in the surgery when treating a patient with autism, given the huge sensory overload that dental treatment presents. This lecture presents an insight into the challenges faced by patients with autism when attending a dental surgery. We will offer some helpful techniques and tools that the dental team can use to help patients with autism to access care. On completion of this lecture, the attendee will have a greater understanding of autism, along with a practical guide on how to help the dental team, and these patients, to navigate their experience of dental care.

PRESIDENT'S GOLF COMPETITION

The President's Golf competition will take place at Galway Bay Golf Resort on Thursday, May 14, from 1.00pm. For anyone booked to do a pre-Conference course on Thursday, we have reserved some tee times on Wednesday, May 13, in the afternoon.

Tee time: 1.00pm Green fees: €60

Playing in three balls. As well as Conference delegates, accompanying persons and all trade exhibitors are also welcome to play. Only delegates registered for the Conference can be eligible for the President's Prize.
