Professional Diploma in Orthodontic Therapy

Trinity College School of Dental Science is inviting applications to the Professional Diploma in Orthodontic Therapy, to commence in September 2016, for a twelve-month full-time course. Orthodontic Therapists are members of a group of dental care professionals who work as part of the dental team. They carry out orthodontic treatment under the prescription and direct supervision of an orthodontic specialist or consultant orthodontist.

The Professional Diploma in Orthodontic Therapy is awarded by the University of Dublin, Trinity College and is a registerable qualification with the Dental Council. The initial core course - Introduction to Clinical Practice - is delivered in the Dublin Dental University Hospital (DDUH) and lasts for 20 days over alternate weeks between September and October, after which students will train in their work placements under direct supervision of an orthodontic specialist or consultant orthodontist for approximately eleven months. During the period of work placement, students will return to DDUH for twelve training days, which are spread over the remaining months.

The course is aimed at those who have a qualification in either Dental Hygiene or Dental Nursing, have at least two years' post-qualification workplace experience (private orthodontic practice / public health orthodontic clinic) and are listed on the appropriate register maintained by the Dental Council. Applicants must have a current BLS certificate. Successful candidates will be required to show evidence of satisfactory protection against Hepatitis B (Hepatitis B titre level must be greater than 100 mIU/mL). They will also be subject to An Garda Síochána (police) vetting. The written support of a suitably qualified orthodontist trainer, who is on the Orthodontic Specialist register of the Dental Council, is also required. Trainers must attend a "Training the Trainers" course in June 2016 to prepare them for their role as a trainer on the course.

Interviews will be held on Friday 13th May 2016 and applicants must be accompanied by their prospective workplace trainer. In addition, the successful students' proposed workplace will be assessed after the interviews to ensure that the facilities are suitable for the clinical workplace training.
