ENDOPERFECTION

# MAXIMISING SUCCESS IN DIAGNOSIS, PAIN MANAGEMENT AND ENDODONTIC TREATMENT

WITH DR GREG CREAVIN, DR LILIA REYNOLDS, AND MS KIM CUSACK

**FRIDAY, NOVEMBER 28, SUITE 402, FURZE HOUSE,  
SANDYFORD, DUBLIN 18, 9.00AM-5.00PM**

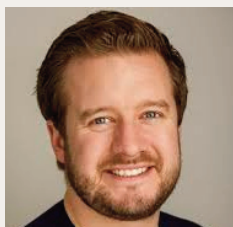

Successful endodontic treatment requires precision in diagnosis and clinical management. This course aims to provide you with the efficient endodontic workflow to make your day-to-day root canal treatment easier and more predictable. The course will focus on strategies to help you achieve maximum and consistent success when providing endodontic treatment. Through careful subjective interviewing and objective assessment of the temporomandibular joints (TMJs) and upper cervical spine, Kim Cusack will explain how to diagnose non-odontogenic sources of pain when odontogenic sources have been excluded. The day will be mostly hands-on in nature.

## Learning aims, objectives and anticipated outcomes

- Learn how to systematically diagnose and treat dental pain;
- how to diagnose non-odontogenic causes of pain;
- provide a systematic and simple approach to instrumentation of the root canal system;
- hands-on training in both single and multi-file systems;
- hands-on demo of modern endodontic obturation techniques; and,
- live patient demonstration.
