

# ADVANCED DIRECT RESIN IN THE ANTERIOR DENTITION: APPROACHING THE COMPLEX CASE TWO-DAY COURSE

A comprehensive approach for the restoration of anterior and posterior teeth with all-ceramic veneers, onlays, bridges and crowns. The emphasis is on adhesive, minimally invasive, tooth-coloured restorations. Cutting-edge, evidence-based theoretical knowledge will be complemented by a strong hands-on component.

## What you will learn

- a simple approach to the direct resin veneer: create masterpieces easily and predictably;
- masking discoloured teeth with direct resin;
- how to handle the peg lateral and microdont teeth;
- rapid diastema closure without overhangs and cants; and,
- a predictable approach to reconstruct worn broken down teeth, creating functional occlusions with direct resin.

## And much, much more...

## Hands-on component

Learning objectives:

- diastema closure (central incisors);
- the peg lateral incisor; and,
- treating palatal and facial tooth surface loss.

## Dr Jason Smithson

Jason qualified at the Royal London Hospital in 1995, achieving a number of awards including The Constance Klein Memorial, The Stafford Millar and The Malcolm Jenkins Scholarships, The American Association of Endodontics Prize, and the Overall Award for Clinical Dentistry. After spending three years in oral surgery residency in London and a further year practising restorative dentistry in London's Harley Street Medical District, he relocated to Cornwall in the extreme southwest of England. Jason practises at Revitalise, Cornwall, UK, where his main focus is microscope-enhanced adhesive dentistry. Jason has achieved Diplomate Status in Restorative Dentistry from the Royal College of Surgeons (England).
